ALEXANDER CITY
Community Based Facility — ALADOC

Post Office Drawer 160
Alexander City, Alabama 35010
(205) 234-7533

Security Level I
Authorized Staff:
13 Correctional Officers
4 Support Staff

Opened: September 1974
Authorized Capacity:
64 male inmates through medium custody

HISTORY AND OVERVIEW

The Alexander City Community Based Facility was opened in September 1974 with a designated capacity of 48 inmates. The original physical plant consisted of three mobile homes for dormitories and a large trailer for mess and facility operations. The facility was expanded in 1976, and its capacity increased to 64 inmates. The site had been leased from the Russell Mill Corporation in Alexander City, but in December 1987, Russell Mill donated the land to the Department of Corrections.

ACCOMPLISHMENTS

During the year, the facility continued its clean-up projects on local roads as manpower permitted. Excluding the inmate maintenance staff, the facility enjoyed 100 percent employment of its inmates in the private sector. The facility was able to provide assistance to the local chapter of the Volunteers in Corrections (AVIC).

	FISCAL REPORT YEAR TO DATE
Total Gross Salaries Paid	$538,227.80
Federal Income Tax Withheld	52,856.74
State Income Tax Withheld	13,096.35
Social Security Withheld	38,611.86
Amount Paid to DOC (25%)	134,550.64
Disbursed to Dependents	29,963.36
Restitution/Civil Claims Paid	24,556.02
Court Ordered Child Support	4,438.17
	$836,300.94

TREATMENT

Inmates assigned to the facility have the opportunity to attend local Alcoholics Anonymous meetings and to visit drug treatment centers. Local ministers also visit the facility, as do volunteers from AVIC. The local volunteers work with the inmates on both an individual and a group basis. A Correctional Officer assigned to the center is trained and qualified to teach a course in Personal Development. Inmates have the opportunity to continue their education if they so desire by enrolling in ABE or GED classes. A two-year college program is also available.

ATMORE
Community Based Facility and Pre-Release Center ALADOC

Post Office Box 537
Huxford, Alabama 36543
(205) 368-9115

Security Level I
Authorized Staff:
14 Correctional Officers
2 Support Staff

Opened: 1976
Authorized Capacity:
144 male work release inmates and 48 male pre-release inmates, all in community custody.

HISTORY AND OVERVIEW

The Atmore Community Based Facility is located approximately seven miles north of Atmore on Highway 21. The Work Release Unit began at the Fountain Correctional Center in 1973 and consisted of ten to fifteen inmates; who were employed at Huxford, Pole and Timber Company. In 1976, the program was moved to its present location. During the month of June, 1989, Atmore Work Release/Pre-Release moved into a newly constructed building with a capacity of 180, with hobby craft/class room combined, 2 men holding cell (for emergency situations), and a chapel.

Atmore Pre-Release Center was a 48-bed compound, which was established on October 1, 1984. Presently, Atmore Pre-Release inmates are housed in a single dorm with Atmore Work Release inmates. The Pre-Release inmates are classed as Minimum-P, and occupy 36 beds of the total capacity of 180.

The pre-release houses inmates who are to be released within 30 days of assignment to the unit (pre-release inmates). During the year, there were 226 admissions to the unit, 141 releases at the expiration of sentence, 46 paroled, and 29 terminated. Terminated disciplinaries were seven, terminated to Community Status 4, no inmates were terminated by due process, four terminated for medical reasons.

The four week pre-release program consists of courses in work attitudes, job hunting skills, family relationships, physical management (including such practical matters as purchasing an automobile), establishing savings accounts, and other courses designed to change thought patterns, habits, and values so as to ease the transition into free world society.

ACCOMPLISHMENTS

According to the most recent statistical report, September, 1990, the financial accomplishments of Atmore Work Release Center for the fiscal year 1989/1990 is as follows:

Total Gross Salaries	$889,572.42
Federal Income Tax Withheld	69,095.16
Amount Paid Department of Corrections (25%)	222,397.43
Transportation Paid Department of Corrections	44,589.00
Civil Claims and Restitution Paid	44,296.50
Medical and Dental Bills Paid	7,413.88
Court Order Child Support Payments	1,273.74

In addition, unemployed inmates contributed 43,898 man hours valued at $147,024.80 to community projects.

SUPERVISED INTENSIVE RESTITUTION

The Atmore SIR District Nine consists of three counties, and one Correctional Officer who currently supervises the SIR inmates. During the year, SIR inmates paid $425.00 in court ordered restitution, $3,555.00 in supervision fees to the state. Presently, there are nine inmates assigned to Atmore SIR.

TREATMENT

The correctional staff makes every effort to insure appropriate response to the personal, phychological and medical needs of inmates assigned to the center. Unemployed inmates who require professional attention to their needs are referred to Fountain Correctional Facility or private health care providers in nearby Atmore or Flomaton if the inmate is employed.

EDUCATION

Inmates assigned to this unit have access and are encouraged to obtain a GED. The GED tests are coordinated by Atmore State Technical College, and a two-year college education program is coordinated with the Jefferson Davis Junior College.

MAINTENANCE

At the present time, a Maintenance Supervisor is assigned to this unit, and with the assistance of inmate labor, our maintenance needs are properly met.

FOOD SERVICE

Since the construction of our new buildings as of June, 1989, our food service needs are furnished by our own kitchen, which has the capacity of serving 48 inmates at one time. We have two mess stewards assigned to our kitchen, a Steward II, and a Steward I.

RECREATION

Recreation activities include: participation in local basketball, and softball tournaments, attending local high school football games, going skating, and fishing.

The inmates have access to two different televisions, and a VCR. The staff of Atmore Work/Pre-Release consists of well trained, well educated experienced people. The staff is always eager to participate in any training seminars and organizations that are beneficial or related to our jobs. Our staff consists of certified Personnel Development Instructors, and certified teachers. Our staff works professionally and willingly with co-workers and inmates.

EMPLOYEES

The employees of Atmore Work Release/Pre-Release consists of: one Director, one Correctional Supervisor II, one Correctional Supervisor I, eleven Correctional I's, two Correctional Officer II's, one Account Clerk II, and one Clerk Stenographer II, and two mess stewards.

BIRMINGHAM

Community Based Facility ALADOC

1216 North 25th Street
Birmingham, Alabama 35234
(205) 252-2994

Security Level I
Authorized Staff:
13 Correctional Officers
6 Support Staff
2 SIR Officers

Opened: 1973
Authorized Capacity:
200 female work release inmates in community custody .

HISTORY AND OVERVIEW

Birmingham Community Based Facility was opened in 1973 as a center for male work release inmates. In April, 1984, the male residents were moved to a new location, and the facility was redesignated a female work release center.

TREATMENT

Each correctional officer has an average caseload of 20 inmates. Individual counseling sessions are required at least once per month. All staff members are available for counseling inmates as the need arises. Correctional Medical Services at the West Jefferson Correctional Facility provides routine psychiatric and psychological services. Inmates requiring extensive treatment are returned to the Tutwiler Prison for Women. In July, 1989, Birmingham Community Based Facility added to its regimen a Substance Abuse Program. This six weeks program is spearheaded by a trained counselor, launching a new class every two months.

EDUCATION

Twenty-two residents are enrolled in GED classes which are conducted on Thursday and Friday evening for two hours. Inmates are also tutored by community volunteers. Inmates are also encouraged to attend area vocational schools and colleges.

RELIGIOUS SERVICES

Religious services are available to all inmates. Four different groups visit the facility on Thursday, Friday, Saturday and Sunday evenings to conduct services and Bible Study.

SIR PROGRAM

The Birmingham SIR District Three consists of seven counties, and two correctional officers. During the past year, each SIR Officer supervised a caseload varying between 24 to 35 inmates. The current success rate is 96%. For Fiscal Year 1990, SIR inmates in the district paid $15,763.00 in court ordered restitution, and $24,522.00 in supervision fees. At the beginninig of the year, there were 46 inmates assigned to SIR District Three. There were 81 admissions, and 24 inmates were released at end of sentence, 25 paroled, and 18 inmates were terminated for disciplinary reasons. District Three closed the year with 51 SIR inmates. SIR officers assigned to District Three also supervised an average of five inmates on PDL.

WORK RELEASE OPERATIONS

	FISCAL REPORT YEAR TO DATE
Total Gross Salaries	$845,188.01
Returned to State to Defray Expenses (25%)	211,193.20
Federal Income Tax	74,162.59
State Income Tax	19,246.35
Social Security Tax	19,246.35
Reimbursement for Transportation Cost	52,109.00
Court Ordered Restitution	19,168.50

5 Support Staff

Opened: 1980
Closed: 1989
Authorized Capacity:
80 male inmates in community custody

Brookley Community Based Facility was merged with Mobile CBF in December 1989 as part of a modernization program by the Mobile Aerospace Industrial Complex.

BULLOCK COUNTY
Correctional Facility ALADOC

Post Office Box 5107
Union Springs, Alabama 36089
(205) 738-5625

Security Level IV
Authorized Staff:
168 Correctional Officers
52 Support Staff

Opened: April 1987
Authorized Capacity:
900 male inmates through minimum/medium custody.

HISTORY AND OVERVIEW

Bullock County Correctional Facility (BCCF) opened April 1987. BCCF occupies approximately 100 acres of land and is located 1.5 miles east of Union Springs, Alabama, Highway 82 East. The facility architecture is of a spinal design, consisting of administrative area, treatment section, population dormitories, and an industries building.

The construction of additional housing for 200 inmates was completed on July 19, 1991. The perimeter is enclosed with a double chain linked fence and a tower for added security. The living quarters consist of 14 treatment dormitories with the capacity of 340 inmates; there are eight population dormitories with the ability to sleep 64 inmates; and 20 single cells that are utilized for mental health observation, and administrative and disciplinary confinement.

MISSION

The primary mission of BCCF is to place emphasis on the whole inmate and inject the "Holistic Approach" through treatment of behavioral problems associated with each inmate's background. Two of the focal treatment modulars are the sex offender treatment and substance abuse programs. The treatment division provides behavior modification courses to those inmates diagnosed as having pronounced manageable emotional deprivations. There is tentative approval to expand the sex offender treatment and substance abuse programs.

ACCOMPLISHMENTS

BCCF has been graced with noteworthy accomplishments during the 1988 - 1989 fiscal year. Because inmate management is paramount and is one of the primary missions of corrections, serious disciplinary problems are minimal at BCCF. The number of major incidents and situations requiring disciplinary action has decreased. This reduction is attributed to the management techniques of security and treatment. Although there is no supporting data available, it is anticipated that there will be a significant decrease in repeated sex offenders and in substance abuse of those inmates who undergo the supportive programs.

TREATMENT AND CLASSIFICATION

The Classification Division at BCCF was in the forefront introducing the "Risk Assessment Guideline Program" to the Alabama Department of Corrections. This division is responsible for initiating the educational program called "SHEAP" or the Self Help Educational Achievement Program for inmates. The Classification Division recognized a need for supportive survival educational skills, and the developed program proved to be synonymous with positive behavior and favorable progress review.

HEALTH CARE

The Health Care Department operates 24 hours a day, seven days a week. This unit is supported by a fully equipped pharmacy, dental and x-ray lab.

The Health Care Department has four (4) single observation cells and one four (4) bed ward that is electronically controlled by a central observation unit and area. An additional section included in the Health Care Department is a fully equipped drug unit. This is utilized to analyze, not only random inmate urine samples, but employee specimens as well. The medical staff is trained to administer normal medical care on a day-to-day basis. Major and emergency medical care cases are transferred to Kilby's Hospital or referred to community medical specialists.

EDUCATION

In June 1989 six (6) inmates successfully completed and acquired their GED. Twenty other inmates participated in the GED classes, and are scheduled to be tested on those subject areas needed to complete their GED. The success of all inmates who participated in this education program is attributed to the Inmate Tutoring Program (SHEAP) and Bullock County Board of Education.

COMMUNITY PROJECTS/RELATIONS

Presently, BCCF provides local community clean-up assistance. Seven Community Project Squads area assigned throughout the surrounding counties of Bullock, Barbour, Macon, and Russell. The officers assigned to these squads are ensuring that quality work is produced by all inmates assigned. Numerous letters of appreciation and commendation have been received from the officials of the various counties.

- Community Drug Awareness Program administered by the "Lifers Club"
- College Internship Program which includes Alabama State University (ASU), Troy State University (TSU), Auburn University Montgomery (AUM), and Tuskegee University
- Community Outreach Program to deter criminal behavior and chemical dependency through lectures, speeches and dramatic productions such as "Why Kill Me"
- Weekend in Recovery Program for inmate family members
- Annual Thanksgiving and Christmas "Feed the Needy Program"
- Elba Flood Relief Project
- Hugo Disaster Relief Project

RELIGION

BCCF has a full-time chaplain and eight inmate chaplain assistants. During 1988 - 1989 fiscal year, BCCF initiated a gospel group. This group has become very active and has generated a great deal of positive public relations representing BCCF. and the Department of Corrections. Throughout this year, the inmate gospel group has performed at approximately 40 various churches throughout the state. They have received area-wide attention and commendations for their professional performances and message that God is in prison "TOO". Hats off to the never-ending security support who sponsor and provide security for the inmate gospel group appearances.

CAMDEN
Community Based Facility **ALADOC**

Route 2, Box 221
Camden, Alabama 36726
(205) 682-4287

Security Level I
Authorized Staff:
11 Correctional Officers
6 Support Staff

Opened: 1976
Authorized Capacity:
125 male inmates through community custody

HISTORY AND OVERVIEW

Camp Camden was originally established in the late 1920's as a Road Camp of the Highway Department. The original structure was destroyed by fire in 1965 and was replaced in 1967 with the present facility. In March 1976, Camp Camden was converted to a Community Based Facility of the Department of Corrections with a capacity of 55 inmates. The capacity was increased in 1983 to 85 residents and again in 1986 to 125 residents.

ACCOMPLISHMENTS

The Camden Drug Treatment Program is on-going and is achieving the stated goal of providing in-patient drug treatment for inmates in the community setting. This year approximately 138 inmates have completed the program since inception.

Work Release inmates earned $568,343.00 in wages during the year. In addition, $142,089.00 was withheld as the 25 percent contribution to the state, $27,791.00 was returned to the department for transportation costs, and $28,127.00 in restitution was paid.

Work Release inmate payrolls increased $109,411.00 during the past year. This is the result of two new employers hiring Work Release residents. Browder Veneer and Sons, of Thomasville, Alabama, employs approximately eighteen inmates and Linden Lumber Company in Linden, Alabama, employs approximately twenty inmates.

The past year at Camden CBF has seen substantial personnel changes. Steward II, Matthew Morgan, retired with 23 years state service and C. E. Ellis, Business Manager, retired with 10 years service. Promotions at Camden CBF are as follows: David Lane, Director, John Baulch, Assistant Director, Marilyn Steadham, Business Manager, Joe Burke, Steward II, and Ronald Sellers, COII.

SIR PROGRAM

The Camden SIR District encompasses seven counties covered by one SIR officer. Seventy-five percent of the SIR inmates in the district successfully completed the program. Supervision fees paid by the SIR inmates totals $8,555.00 and they also paid $1,838.00 in court ordered restitution payments. At the end of the year, 18 SIR inmates remained in the program.

DECATUR
Community Based Facility **ALADOC**

Post Office Box 5279
Decatur, Alabama 35601
(205) 350-0876

Security Level I
Authorized Staff:
17 Security
5 Non-Security

Opened: May 31, 1981
Authorized Capacity:
200 male inmates in community custody.

HISTORY AND OVERVIEW

The Decatur Community Based Facility is housed in a former church and rescue mission. Renovation was begun in October 1980, using inmate labor. Inmates were initially received in May 1981. There were 120 inmates initially housed. The State purchased the facility in November 1981 for approximately $100,000.00. Decatur Community Based Facility added a new dormitory in January 1990, increasing the inmate capacity to 200.

ACCOMPLISHMENTS

During the fiscal year, inmates earned gross wages over $1,308,000.00. Currently, there are 50 employers in the job pool which provide a wide variety of employment opportunities for the inmates. Many of the inmates continue their employment with their employers upon release.

The new dormitory was completed and opened in January 1990. A renovation of old office space was converted for classroom use by inmates. New floors were installed throughout most of the facility. New roofing was installed on one dormitory. The kitchen also received several major pieces of equipment. A Steward I position was also approved and filled due to the increase in inmate population.

Public Service projects increased during the year. Inmates provided 21,498 hours of public service duty valued at $79,407.75 to the community.

TREATMENT

Counseling is available to all inmates upon request. Additionally, community resources are available to those inmates who have demonstrated trustworthiness. The community resources include Narcotics Anonymous and Alcoholics Anonymous, Legal Aid and Mental Health Counseling at North Central Alabama Mental Health Center.

EDUCATION

Coordination was made with the Decatur Public School System to provide on-site ABE/GED classes at Decatur Community Based Facility. The programs began as a two night a week program, but progressed to four nights a week due to the increase in inmate attendance. Inmates also attend Calhoun Junior College to earn skilled trades.

RECREATION

Recreational activities available to the inmates include athletics, hobby crafts, table games, and video games. Inmates are allowed to rent videos for weekend viewing. A weight room with various weight lifting equipment is available for use. A basketball and a volleyball court are also available for inmates' use.

RELIGIOUS SERVICES

Religious services are available at the facility. Inmates with sponsors may attend services in the community and other inmates without sponsors are allowed to attend services in the community with the supervision of staff personnel. A religious group from Oakwood College has been instrumental in providing religious services and activities for the inmates.

WORK RELEASE INMATES

Work Release inmates earned $1,308,178.07 during the year. Federal income tax withheld amounted to $97,436.37; $87,302.82 was withheld for social security and $25,127.58 for state income tax. Of the gross wages, 25% ($327,077.40) was returned to the state to help defray program costs. $49,435.00 was paid to the state for transportation costs and $33,764.91 was paid in restitution to victims. Inmates also paid $7,945.27 in court ordered child support.

SIR PROGRAM

The Decatur SIR District Two is manned by three correctional officers who cover six counties. Each of the SIR officers supervise from 17 to 25 inmates. The success rate for the district has been 84%. SIR inmates have paid $24,988.60 in restitution and $26,201.00 in supervision fees. At the beginning of the fiscal year, there were 52 inmates assigned and 101 new inmates were admitted. There were 31 inmates released end of sentence, 33 paroled and 25 were terminated for disciplinary reasons. At the end of the fiscal year, there were 57 SIR inmates remaining in the program. PDL inmates assigned to Decatur CBF were also under the supervision of SIR officers. There were nine PDL inmates assigned to Decatur SIR District Two at the end of the fiscal year.

DRAPER
Correctional Center   ALADOC

Post Office Box 1107
Elmore, Alabama 36025
(205) 567-2221

Security Level IV
Authorized Staff:
178 Correctional Officers
28 Support Staff

Opened: 1939
Authorized Capacity:
1,053 male inmates through medium custody

HISTORY AND OVERVIEW

Draper Correctional Center is an adult reformatory institution for male first offenders. The institution was constructed in 1939 to accommodate 600 inmates. It currently accommodates 1,053 inmates. It is located in Elmore County on State Highway 143 in the Speigner Community.

The inmate population is housed in seven dormitory-type cell blocks and a 48-man capacity segregation unit.

ACCOMPLISHMENTS

During the preceding 12 months, with a shortage of staff, emphasis has been primarily on security. The continuous and conscientious efforts of the staff has resulted in no escapes and a significant reduction in contraband coming into the institution.

A primary concern is preventing drugs from coming in. The random drug testing of inmates this year produced only one that tested positive for drugs. There were 998 tests conducted. Other than the random testing, tests are run on inmates being assigned to certain jobs within the Draper/Staton Complex, inmates going out to work release, and any inmate suspected of drug usage.

A drug treatment program for the inmates was started this year. Initially, a class of 18 inmates was begun and ran eight weeks. Soon there will be two classes of 18, for a total of 36 inmates participating in the program. Two drug treatment counselors were employed to conduct this program, which is funded by a federal grant.

Any institution that is over 50 years old, such as Draper, has many and ever incurring maintenance problems. A few of the projects completed this year was the retiling of the floor in portions of the kitchen and replacing ceiling tiles to bring it in line with new health department standards; considerable remodeling and repairs to staff houses; remodeling and converting dormitory cell number 4 into our drug treatment cell, to include a classroom and offices for the counselors; and construction of a ramp and pit for our new industrial-size trash compactor that serves Draper, Staton and Elmore Correctional Facilities.

TREATMENT

There are two Psychological Associate II's assigned to Draper. Group intervention techniques include stress management, sexual adjustment, anger reduction, self-concept enhancement, depression reduction, and reality therapy. Additionally, various programs for values clarification, improved decision-making, and family planning have been implemented to assist inmates in societal reintegration.

A substance abuse program and a pre-release program are also available to inmates. Inmates are seen on a case-by-case basis. Any inmate identified as psychotic or in need of mental health intervention is referred to the contract health provider. Referrals to the licensed psychologists are followed up to insure adequate care and to prevent duplication of services. Twelve-step programs (Alcoholics Anonymous, Narcotic Anonymous, and Sexual Addicts Anonymous) are available to inmates.

EDUCATION AND VOCATIONAL SERVICES

Draper has an ongoing policy to provide every inmate an opportunity to better themselves educationally and/or vocationally. Throughout the year, the following number of inmates participates in the various programs on a continuous basis. Currently, there are 195 inmates attending the J. F. Ingram State Technical College. There are 209 inmates attending the Draper/Staton Trade School, which is an extension of J. F. Ingram. A varying number of inmates (7 - 35) during the year are enrolled in college, either full-time or part-time, with the Central Alabama Community College Extension Program at Draper. Additionally, 30 to 50 inmates participate in a GED Program established cooperatively with J. F. Ingram.

WORK ACTIVITIES

Every inmate at Draper who is not medically classified as unable to work is assigned to a job. In addition to jobs within the institution, the Agriculture and Industries Division, operating within the Draper/Staton Complex, provides job assignments for many of Draper's inmates. The following are numbers of inmates provided job assignments on an ongoing basis:

Farm Operation	200 - 250
Furniture Plant	105
Canning Plant (in season)	25 - 35
Milk Processing Plant	5
State Garage	23
Kitchen	114
Laundry	27
Inside Clean-Up	87
Outside Clean-Up	14
Maintenance	20 - 25
Miscellaneous	15 - 20

RECREATION

Recreation activities at Draper include sports, arts and crafts, leather and ceramic shops. Athletic events within the institution include intramural softball, basketball, football, and volleyball. Other activities include track, weightlifting, horseshoes, soccer, frisbee, chess, and dominoes. State and regional events hosted were the regional basketball, softball, and football tournaments and the state track and football tournaments. Draper also has an institutional band and a gospel group which entertains the inmate population.

RELIGIOUS SERVICES

Draper continues to provide a variety of church services and religious activities to meet the spiritual needs of the inmates. Included are regular worship services, revivals, singings, seminars, and Bible studies. Religious movies are shown on Friday and Saturday evenings. Listening areas are provided for inmates to listen to cassette tapes of church services from home. Much needed improvements were made in the decor of the chapel this year with funds provided through the Inmate Welfare Fund and labor by the inmates. Additional electronic equipment was also obtained with Inmate Welfare Funds to enhance the overall program.

FOOD SERVICES

Draper's kitchen provides approximately 4,600 meals daily. Approximately 1,500 of these meals are transported to Elmore

Correctional Facility. Food is prepared on a four-week rotating menu prepared by a registered dietician. Draper also provides approximately 4,000 loaves of baked bread a month to be consumed at six facilities.

EASTERLING
Correctional Facility **ALADOC**

Post Office Box 10
Clio, Alabama 36017
(205) 397-4471
(205) 397-2543 (FAX)

Security Level IV
Authorized Staff: 224
181 Correctional Officers
43 Support Staff

Opened: March 4, 1990
Authorized Capacity: 652
600 General Population
52 Segregation - male inmates through medium custody

HISTORY AND OVERVIEW

Easterling Correctional Facility was officially opened March 4, 1990, with more than 2,000 visitors. The first group of inmates were received on March 1, 1990.

Easterling Correctional Facility has a total of five general population dormitories housing 120 inmates in each dorm.

The institution is located on Highway 10 East, approximately 1 1/2 miles outside the city of Clio, Alabama. The cost of the prisons construction was approximately $16.2 million.

One dormitory is designated as a Segregation Unit which houses a maximum of 52 inmates.

ACCOMPLISHMENTS

Easterling Correctional Facility provides inmate labor for a variety of local and governmental agencies.

COMMUNITY WORK SQUADS

Squad Number 1 works primarily on the Lake Point State Park in Eufaula, Alabama. Their duties are to keep the park clean, and keep buildings clean and painted when needed.

Squad Number 2 works in communities as needed. At present this squad is assigned to the city of Clayton for a special project until completion, approximately two (2) months.

Squad Number 3 works primarily for the State Highway Department. They are responsible for keeping the right-of-ways clear of trash cans and glass.

Squad Number 4 works primarily on institutional grounds.

RECREATIONAL SERVICES

Easterling CF recreational department has provided an excellent and well rounded sports program. The activities that we provide at Easterling at the Intramural and State level are basketball, volleyball, football, softball, horseshoes, track, dominoes, chess, checkers and weightlifting.

The recreational department has developed a physical fitness and recreation program aimed at motivating inmates participation in self-discipline, teamwork, fair play and preparation for life or life adjustment. Each team is set up and monitored by the sports director. The teams compete with teams from other institutions throughout the year. Easterling has won first and second place trophies in the competitive sports.

TREATMENT SERVICES

The institutional psychologist is the principal provider of psychological services at Easterling CF. He is the primary referral source for the contract psychiatrist and counseling psychologist and provides crisis intervention counseling until regular sessions can begin. The institutional psychologist directs mental health programs and inmate workshops such as Substance Abuse, Anger Management, Values Clarification and Depression. He facilitates and is the primary coordinator for each group assistance programs such as Alcoholics Anonymous, and Narcotics Anonymous. The institutional psychologist provides supportive services to the Classification Unit during inmate reviews for change of custody, transfers and community based programs. Updated psychological assessments and evaluations are conducted on a basis of inmate need and departmental request. Additionally, the institutional psychologist makes mental health rounds to the segregation unit three (3) times per week to evaluate the psychological status of these inmates. Information and referral services to private practitioners, treatment facilities and state agencies are made by the institutional psychologist as part of the Employee Assistance Program for mental health needs.

EDUCATIONAL SERVICES (SHEAP)

The Self Help Educational Achievement Program (SHEAP) and the nationally renown Laubach Literacy Program are two (2) separate educational programs that we, here at Easterling CF, coordinate together to provide a highly successful educational program. The program utilizes qualified inmate tutors with a minimum of a GED. Some of our tutors have college degrees, a few in the educational field. All inmates used as tutors must pass a pre-GED test before he is utilized as a tutor. The test consists of five (5) parts, Mathematics, Literature and the Arts, Science, Social Studies and Writing Skills and has 134 questions with the emphasis on Mathematics. The inmate must have at least 70% overall grade and an 80% average in the subject that he is to instruct. This insures us of the inmate knowledge of that subject. The tutors for the Laubach Program must attend a two day seminar conducted by the Central Alabama Laubach Literacy Council and be certified as Laubach tutors.

The Laubach Literacy Program starts at the first grade level and goes to a fifth grade level, upon completion of Laubach, the inmate is placed in SHEAP to continue his education and prepare himself for the GED test. He is then considered for more formalized training through Sparks Technical College.

RELIGIOUS SERVICES

Religious services provide opportunity for inmates of various faith groups to follow through in their commitment of faith. These services are conducted in the institutional chapel and other various areas as assigned. The chapel is completely furnished, and presents a beautiful worshipful atmosphere for all services such as worship services, Bible studies, prayer services, discipleship seminars, revival crusaders, drama presentations, song services, and practices, and special holiday services are scheduled on a weekly and monthly basis. Many religious representatives volunteer their time on a weekly and monthly basis. Also, an appreciation service is scheduled to recognize all our volunteers which contribute their time to come and share with the men. Religious literature such as devotional materials, books, tracks, bible studies, bibles, tapes, and correspondence courses are provided by Prison Ministries, churches, and volunteers.

The appointed chaplain provides spiritual guidance and counseling to staff and residents. The chaplain visits the segregation unit and infirmary on a weekly basis and many times daily. The chaplain speaks to various faith groups, as well as attends various ministerial conferences. The chaplain also coordinates with all religions volunteers in regards to their services. The chaplain provides instruction on family ties and religion to the pre-release program.

ELBA
Community Based Facility ALADOC

Post Office Drawer 427
Elba, Alabama 36323
(205) 897-5738

Security Level I
Authorized Staff:
11 Correctional Officers
4 Support Staff
3 SIR Officers

Opened: June 1976
Authorized Capacity:
100 male inmates community custody.

HISTORY AND OVERVIEW

Elba Community Based Facility was opened as a Work Release Center in June 1976 with a capacity of 55 work release inmates. The capacity was increased to 88 in 1980 and to its present capacity of 100 in 1984. The physical plant and partially fenced grounds are a former Road Camp of the Alabama Highway Department. Inmates are housed in four dormitories with connecting recreation, food services and administrative areas.

ACCOMPLISHMENTS

Elba CBF had several noteworthy accomplishments for 1990. The first is maintaining a high level of employment of the inmates assigned. The facility has consistently maintained an 80 - 85 percent employment rate during the past year. Secondly, the facility staff and the inmates assigned to Elba CBF spent long and numerous hours of community project work during the month of March. This time was spent assisting Elba and the citizens rebounding from the flood that completely devastated the entire area inside of the levee around the city. The staff and inmates are still rendering assistance when called upon some eight months after the flood.

Elba CBF was fortunate enough this past year to have installed a new fire alarm system for the entire facility. The system is more up-to-date and will enhance fire/smoke detection more effectively. The staff of Elba CBF is privileged to a "drug-free working place" as the staff are tested on a regular basis by using the department computer making the selections by social security numbers.

The Food Services department currently is waiting on the installation and completion of a new walk-in freezer/cooler. This new item of equipment will enable Elba CBF Food Service department to expand services and capabilities.

Elba has made several noticeable improvements during the past year. Some of the improvements include erection of awnings over all of the picnic tables in the visiting area. The Welfare Committee purchased the materials to complete this project.

TREATMENT

The inmates assigned to Elba CBF have formed an AA group named "The Freedom Fighters", which has been recognized by the national and area groups as being self-supporting and has been given recognition by having their group placed on the list of one of the area groups. This accomplishment has made the inmates in the group very proud and has given them a common objective to obtain.

EDUCATION SERVICES

Formal education opportunities include an Adult Basic Education (ABE) class and participation in programs of higher learning offered by area junior colleges and trade schools. The ABE program is aimed at raising levels of literacy and basic arithmetic skills as well as preparing students for the high school GED examination.

RELIGIOUS SERVICES

A variety of religious services and programs are offered at the facility. A 52-foot double-wide trailer was purchased through private donations and by the efforts of local church organizations. Activities include Bible study, prayer meetings, revivals, and choral events. The facility was dedicated during the past year in memory of the late Bill Smart, commonly known to the inmates as "Brother Bill".

WORK RELEASE INMATE EARNINGS

Work Release inmates earned $663,560 in wages during the year. From this amount, they paid $42,745 for federal income tax, $12,673 for state income tax, and $42,109 Social Security taxes. They also contributed 25% of earnings to the State in the amount of $165,893 and $33.008 for transportation costs. These inmates paid $38,883 in restitution to victims and $3,768 in court-ordered child support payments.

SIR PROGRAM

The Elba SIR District VIII consists of eight counties and is staffed with three SIR officers. SIR officers carried caseloads varying between 15 and 25 inmates. District VIII has a success rate of 80%. SIR inmates in the district paid $15,413 in court-ordered restitution and $17,380 in supervision fees to help defray program costs.

ELMORE
Correctional Facility ALADOC

Post Office Box 8
Elmore, Alabama 36025
(205) 567-2221

Security Level III
Authorized Staff:
79 Correctional Officers
13 Support Staff

Opened: 1981
Authorized Capacity:
520 male inmates in medium custody.

HISTORY AND OVERVIEW

Elmore Correctional Facility was opened in October 1981, as the Staton Annex. The facility was renamed on September 16, 1986. Located one mile from the Staton Correctional Facility, Elmore consists of five identical housing modules each with a capacity of 104 inmates. Two additional buildings house administrative offices and dining area. The perimeter is delineated by a double chain linked fence.

ACCOMPLISHMENTS

During the year, inmates at Elmore CF contributed over 530,989 man hours of labor to state, county, and local agencies. Calculated at minimum wage, the value of this labor was more than $1,778,816 .... a substantial savings to taxpayers.

TREATMENT

There is a full-time psychologist assigned to the center. Inmates are seen on a case-by-case basis. Treatment services include reality therapy, self-concept enhancement, sexual adjustment therapy, stress management therapy, and therapy for controlling anger. In addition, relaxation therapy and programs designed to improve distorted thinking and to aid in the development of better decision-making skills have been added as mental health programs.

A new six weeks intensive substance abuse program and a pre-release program are available to the inmates. Also, group seminars concerning depression, value clarification, and healthy use of leisure time have been initiated. Alcoholics Anonymous programs are also available. An inmate evaluated as either psychotic or in need of mental health counseling is referred to the contract health provider. The referrals are followed up to insure adequate care and to prevent duplication of services.

On August 6, 1990, Drug Treatment Counselor Wade Wofford transferred to Elmore CF from Bullock CF. He has designed and implemented an intensive eight-week inpatient program similar to those already existing in other institutions. The first treatment group began on August 13, and twenty-three participants successfully completed treatment on October 5, 1990. A second treatment group is currently in progress, with a projected completion date of December 14, 1990.

RELIGIOUS SERVICES

Religious services at Elmore CF are overseen by the full-time area chaplain who is based at Staton Correctional Facility. He is assisted by two volunteer assistant chaplains. Christian services are conducted every evening by free world volunteers. Approximately 75 inmates attend each service. Islamic services are conducted daily by the inmates with an average attendance of 15 inmates. Outside support for the Islamic community is available upon request. Other religious groups are allowed to counsel and conduct services upon request by the inmate as the need arises.

RECREATIONAL ACTIVITIES

The recreational program is a vital part of the institution's operation. Elmore CF has a full-time recreational director who has considerable experience in organizing team sports.

The recreational program consists of:

A. Team sports such as football, volleyball, basketball, flag football, weightlifting, track and softball.

B. Table games - chess, checkers, dominoes, scrabble, and spades.

C. Elmore makes available equipment such as guitars, amplifiers, drums, and microphones for inmates who wish to participate in one of the four musical groups at Elmore CF.

D. Guidelines have been established for the use of the hobby craft shop which has been built recently.

E. All modules are equipped with four televisions, one per 25 inmates, which are equipped with cable services and HBO.

EAST THOMAS
Community Facility

924 Bankhead Highway, West
Birmingham, Alabama 35204
(205) 328-4175

Security Level I
Authorized Staff:
18 Security
6 Non-Security

Opened: April 1984
Authorized Capacity:
152 male inmates in trusty and community custody.

HISTORY AND OVERVIEW

This facility was established in April 1973 as a 45-man work release unit, housed in the old Birmingham City Jail. In 1975, it was moved to 1216 25th Street North and designated the Birmingham Community Based Facility with capacity of 65 inmates.

On April 9, 1984, the Birmingham CBF was relocated to its present site and renamed the East Thomas Community Based Facility. The facility is a modern one and one-half story brick building located on approximately three acres of land.

It is located on the northwest side of the city on U. S. Highway 78, West.

SOCIAL SERVICES

The staff at East Thomas is proud of the various services that are available to the residents.

GED CLASSES are conducted in conjunction with the Birmingham School Board.

AA AND NA COUNSELORS have volunteered many hours of work in meeting the substance abuse needs of the residents.

RELIGIOUS SERVICES are provided on a weekly basis by various denominations.

PERSONAL DEVELOPMENT CLASSES are conducted quarterly.

MONEY MANAGEMENT CLASSES are also provided.

OUT-PATIENT MENTAL HEALTH counseling is available through the local mental health facility.

COMMUNITY SERVICES

Five days a week, 22 residents check out to community projects supervised by the State Highway Department or the State Trooper Post. On weekends, additional volunteers have given their services to various local communities.

RECREATION

East Thomas has an active sports program, sponsoring teams in the inter-city basketball and softball leagues, which has resulted in several new trophies being added to the Center's trophy case.

SIR PROGRAM - REGION NUMBER FOUR

SIR District Four consists of seven counties: Jefferson, Shelby, Tuscaloosa, Bibb, Greene, Hale and Pickens.

There are five supervision officers with an average caseload of 25 clients each. Since April of 1983, over $158,189.56 has been collected in court cost and restitution and over $461,318.50 has been collected in supervision fees. There has been 2,065 participants with a 66 percent successful completion rate.

WORK RELEASE INMATES

Work Release inmates earned $1,012,584.88 during the year. Federal income tax withheld amounted to $87,895.58. $73,209.28 was withheld for social security and $24,182.65 for state income tax. Of the gross wages, 25 percent ($253,109.46) was returned to the state to help defray program costs; $45,429.00 was paid for transportation costs, and $52,978.80 in restitution to victims. Inmates also paid $5,098.00 in court-ordered child support.

G. K. FOUNTAIN
Correctional Center

ALADOC

Fountain 38
Atmore, Alabama 36503
(205) 368-8122

Security Level IV
Authorized Staff:
128 Correctional Officers
35 Support Staff

Opened: 1936
Authorized Capacity:
836 male inmates through medium custody.

HISTORY AND OVERVIEW

The G. K. Fountain Correctional Center, formerly Atmore Prison and Moffett State Farm was constructed in 1928 and renovated in 1952. The inmate population is housed in dormitories and in 64 single cells used for disciplinary, administrative and protective custody segregation.

TREATMENT

A psychologist provides both group and individual counseling and is available daily. Group counseling focuses on areas such as substance abuse, depression, stress management, sexual adjustment, values clarification, reality therapy, anger induced acting-out, self-concept enhancement and healthy use of leisure time. Inmates nearing release attend a two day pre-release workshop which focuses on the various readjustment demands facing the ex-offender. The psychologist also is responsible for the smooth operation of the in-house Alcoholics Anonymous and Substance Abuse Programs. Free world counselors, who are recovering addicts, whose crimes were drug and/or alcohol related assist the inmates in dealing with their addictive problems.

EDUCATIONAL SERVICES

Both an Adult Basic Education (ABE) program and a Junior College program are available to inmates. The local Community Library Council has continued to assist in organizing and updating the inmate library.

RELIGIOUS SERVICES

There are numerous opportunities for worship by inmates of all faiths at the Fountain Chapel. Four to six revivals take place each year; and Bible classes as well as Bible studies are conducted daily. Eight services are conducted each week by different denominations, and Kairos holds four weekend seminars per year with regular monthly reunions. Baptisms are conducted by the chaplain upon request, and he distributes religious literature such as Bibles, books, magazines, tracts, and periodicals. Prayer groups meet daily in the chapel, and many free world volunteers participate in the chapel program.

RECREATION

A special recreational program was developed in-house to provide alternative game programs for older or physically disadvantaged inmates. These programs include dodgeball, tennis and handball. A newly constructed half-court area was provided for recreational basketball.

NEW CONSTRUCTION

A 180-bed metal dormitory was constructed on the southwest corner of the institutional grounds. The old temporary housing unit was razed.

FRANK LEE
Youth Center

Post Office Box 208
Deatsville, Alabama 36022
(205) 285-5591

Security Level II
Authorized Staff:
30 Correctional Officers
10 Support Staff

Opened: 1964
Authorized Capacity:
185 male inmates under age 25 in minimum custody.

HISTORY AND OVERVIEW

The Frank Lee Youth Center was named for A. Frank Lee, Commissioner of Corrections from January 1960 to October 1969. The center opened in 1964 with a capacity of 104 inmates. Two additional dormitories built about 1975 increased the capacity to 200. The inmate population is housed in four dormitories, each containing 50 beds. The floor plan is a modified "telephone pole". In the absence of security structures, the physical plant resembles a school rather than a prison. The chief security measure imposed is frequent, irregular head counts.

TREATMENT

The center is a treatment institution. The goal is to change an inmate's unacceptable behavior and to prevent his return to prison. To accomplish this goal, emphasis is placed on counseling, education, vocational training, religious and recreational activities. During the year, 15 inmates completed a 40-hour course in problem-solving techniques. A two day pre-release course is mandatory with inmates attending group sessions to discuss responsibilities and obligations of the ex-felon. Approximately 156 inmates attended this program in FY 1990. Staff members prepare briefings and resources to support the efforts; and local community leaders and church organizations are invited to participate as group leaders. FLYC began an intensive drug treatment program in August 1990. There were 16 inmates to complete the first eight-week program.

EDUCATIONAL SERVICES

Educational opportunities are made available to every inmate. Adult Basic Education (ABE) classes are available at the center and at the nearby technical college. Inmates are allowed to attend Central Alabama Community College classes held at the Draper/Staton complex. Inmates are placed in trade assignments through joint efforts of the center's classification committee and the director of student affairs at the technical college. An inmate may earn a diploma if he completes a course, or he may be given a certificate for the number of hours completed. For FY 1989 - 1990 FLYC had four inmates to receive associate degrees.

PSYCHOLOGICAL SERVICES

A full-time psychologist is assigned to the center to provide counseling and testing for the inmates and also to serve as a member of the job and progress review boards. Practicum students working on their masters degree in guidance and counseling at Troy State University, Maxwell Air Force Base, and AUM have proven to be invaluable in providing additional hours of counseling. Also, a free world volunteer conducts a weekly Alcoholics Anonymous and Drug Awareness group with an average attendance of 38.

RECREATIONAL ACTIVITIES

Activities include football, basketball, softball, and baseball during their respective seasons, and going to other institutions periodically to compete in these sports. Tournaments are also held in weightlifting, softball and basketball. Up-to-date weightlifting equipment is available, and an area is provided for inmates to work on hobby crafts, play dominoes and checkers.

RELIGIOUS ACTIVITIES

A full-time chaplain is responsible for conducting or directing religious activities to meet the spiritual needs of all the inmates. Local volunteers are involved in approximately half of the activities which are planned and coordinated by the chaplain. Religious activities include special Bible classes, evangelistic crusades, bi-weekly religious movies, and an average of four chapel services each week. A Fellowship Day is held one Saturday in each quarter to recognize those inmates who attend services regularly. Friends and family of the recognized inmates are invited to participate, with a local church providing lunch for the entire group.

ACCOMPLISHMENTS

FLYC provides inmate labor for Tallapoosa and Elmore counties. The inmates clean trash and rubbish from roadways.

FLYC is also participating in the Adopt-A-Mile Program for County Road Number 3, which covers six miles. FLYC began an Intensive Drug Treatment Program and turned one of the dorms into the drug treatment unit. FLYC is in the process of adding a new addition to the kitchen. A fence was put up around the ballfield. FLYC received a new phone system which enables the center to receive and handle phone calls more efficiently.

Post Office Box 1568
Hamilton, Alabama 35570
(205) 921-7453

Security Level III
Authorized Staff:
26 Correctional Officers
10 Support Staff

Opened: May 1981
Authorized Capacity:
168 male inmates through minimum and medium custody

HISTORY AND OVERVIEW

The Hamilton Aged and Infirmed Center (HAIC) was established May 10, 1981, when HAIC and the Hamilton Work Release Center combined and moved to what previously was the Northwest Alabama Medical Health Center. In August 1985, HAIC and Hamilton Work Release Center separated, with HAIC remaining in its present location. HAIC houses minimum and medium security, aged and infirmed inmates. The facility also houses minimum security staff inmates for facility upkeep and road squads. HAIC has approximately five acres within the security fence. The mission of HAIC is to house inmates with Medical Class III and aged and infirmed designation, who have a security class no greater than medium. These inmates are housed in such a manner as to provide for security and the necessary medical needs of the individual.

With the introduction of "Speeding Tickets", correctional staff are able to control and correct inmate behavior without the use of formal disciplinaries. "Speeding Tickets" correct inappropriate behavior by depriving the inmate of various privileges for a specified period of time.

MAINTENANCE

With the help of inmate labor, the HAIC has remodeled several areas of the interior of the center during the reporting period. The administrative office areas were renovated; a new floor tile laid, carpet was installed, several walls were torn down, wiring for computer terminals was installed, ceilings were replastered, and the entire area repainted.

A new fire/smoke alarm system has been installed. The glass roof of the solarium was removed and a solid top with glass panels was installed.

TREATMENT

Every inmate has access to a classification specialist, psychologist and correctional officers, who assist them with any problem. Inmates have close contact with staff who assist them in such matters as passes/furloughs, IGT, visitation, and institutional job assignments. A psychologist is assigned to HAIC through a contract with Northwest Alabama Mental Health Center. This psychologist is responsible for psychological evaluations of inmates, drug and alcohol abuse programs, and general counseling sessions with inmates.

MEDICAL

Correctional Health Care (CHC) has the contract to provide continuous medical services for inmates. The medical staff supervises the dispensing of medications and sets up sick call for inmates. A medical doctor tours the center three times a week. When treatment services are required but not available at this center, appointments are made at Cooper Green Hospital, Baptist Montclair Hospital in Birmingham, Walker Regional Hospital in Jasper, or Marion County General Hospital in Hamilton.

HAMILTON
Work Release Center

ALADOC

Post Office Box 1628
Hamilton, Alabama 35570
(205) 921-9395/9308

Security Level I
Authorized Staff:
12 Correctional Officers
4 Support Staff

Reopened: 1985
Authorized Capacity:
130 male inmates in community custody.

HISTORY AND OVERVIEW

The Hamilton Community Based Facility was established on July 29, 1976, as a 55-man work release center. On May 10, 1981, the facility moved to what had been the Northwest Alabama Mental Health Center, and the capacity was increased to 116 work release inmates and 64 aged and infirmed inmates. In August, 1985, the work release center moved to the reconditioned road camp buildings, and the capacity was increased to 130 work release inmates.

SUMMARY OF ACCOMPLISHMENTS

During FY 1989 - 1990, Hamilton CBF maintained a high rate of employment for its inmates. Employed inmates earned wages totaling $983,482.90. From this amount was deducted the 25 percent contribution to the state $245,865.16 to help defray program costs. Additionally, $61,433.54 and $18,490.01 was withheld for federal and state income taxes, and $58,903.91 for social security taxes. Working inmates paid to the state $44,518.00 for transportation, $48,606.28 for court ordered restitution and $5,390.65 for child support. In addition to paid employment, inmates provided 4,329 man hours of community labor valued at $15,677.25.

TREATMENT

Each inmate is assigned a case load officer to advise and assist him with problems he may have. The officer also recommends members of his case load for such privileges as passes and furloughs, pre-release leaves, institutional good time, etc.

RELIGIOUS SERVICES

Religious services are held three times per week for the inmate population and special groups are brought in periodically during the year for singing and revivals.

RECREATIONAL ACTIVITIES

Recreational activities are offered to the inmate population on a continuous basis. Summer softball and winter basketball are played by the facility inmates through the Hamilton City League.

SIR DISTRICT NUMBER 1

The Hamilton Work Release Center is responsible for the nine county SIR Districts in the northwest corner of the state. Two officers are assigned to supervise the case load which averages between 35 to 40 inmates. For FY 1989 - 1990, $17,390.00 was collected in fees being returned to the state general fund. Inmates paid back to the counties $19,357.11 in court ordered costs and restitution. The inmates also performed a total of 1,148 hours of community service work for a savings of $4,362.40.

HOLMAN
Prison **ALADOC**

Holman 37	Security Level VI
Atmore, Alabama 36503	Authorized Staff:
(205) 368-8173	163 Correctional Officers
(205) 368-1095 (FAX)	31 Support Staff

Opened: 1969
Authorized Capacity:
674 male inmates through maximum custody and 90 on death row which makes a total of 764 inmates

HISTORY AND OVERVIEW

The William C. Holman Prison was officially opened in December 1969, and the first inmates were received December 15, 1969. At that time, Holman was the only maximum security prison in the state. Holman's Death Row houses the largest death row population and the state's execution chamber.

The inmate population at Holman presently is housed in four 90-bed dormitories and one 160-bed dormitory and 244 single-man segregation cells. The present capacity of the Holman unit is 764 inmates; however, a reduction of 56 beds is anticipated in the near future.

ACCOMPLISHMENTS

The Holman unit Employee Assistance Program (EAP) administrator is now a duty of the Administrative Services Officer. Employees feel free to approach this individual in an effort to regain control of their lives, due to a loss of same through substance abuse, etc.

Additionally, increased and better communication between employees and inmates has been encouraged. Consequently, as a result of this increase communication, fewer inmate grievances and law suits have been filed.

TREATMENT

Holman has a full-time psychologist assigned and further coverage is provided through contract services. A psychiatrist visits Holman four times monthly, and a registered nurse monitors the medical treatment of inmates in need of medical health services. Mental health groups are conducted regularly and the institutional psychologist monitors personal development, a 40-hour program designed to teach basic interpersonal, occupational, and life skills.

Psychological testing and individual counseling are provided as required. Inmates in segregation are monitored through rounds conducted twice weekly. A mental status exam is completed on each inmate confined to segregation for a period of 30 days. Inmates assigned to death row are monitored through rounds conducted at least weekly. Referrals are made to the Kilby Hospital in cases requiring special evaluation, hospitalization or medication. Additionally, a self-help group visits Holman bi-weekly to assist the inmate AA group in group development.

FACILITIES

The Holman unit industrial buildings (Metal Fabrication, Tag Plant, and Trade School) were re-roofed. A new administrative building was constructed and now provides excellent office space in a congenial environment. Two new generators were recently installed to provide emergency lighting. Also, the facility was repainted, inside and outside. The Canteen and chaplain's office were relocated to provide increased area. Two new chemical feed pumps for water treatment were installed. Additionally, a new recreational yard for segregation was opened, to include a volleyball court, basketball court, and horse shoes. The segregation captain's office was moved to the segregation area to provide better supervision. Central Control's bare cement floor was tiled and plexiglass now surrounds the shower areas.

RELIGIOUS SERVICES

A full-time chaplain is assigned to Holman. Services provided by the chaplain include visiting inmates on death row and in segregation and the distribution of religious materials to those areas; recruiting and orientation of volunteers from area churches to provide religious services, Bible classes, seminars, revivals, song services, etc.; providing religious services and maintaining a religious tape library for death row inmates, counseling, recruiting volunteers to provide special events such as greeting cards for Mothers' Day and other special events.

KILBY
Correctional Facility

ALADOC

Post Office Box 125
Mt. Meigs, Alabama 36057
(205) 271-2300
(205) 271-0630 (FAX)

Security Level V
Authorized Staff:
158 Correctional Officers
51 Support Staff

Opened: 1968
Authorized Capacity:
884 male inmates

HISTORY AND OVERVIEW

Kilby Correctional Facility was erected in 1968 as the Mt. Meigs Medical and Diagnostic Center. In 1970 it was renamed Kilby Correctional Facility and became the reception and classification center for all males sentenced to prison. The only exceptions are those male inmates who have been sentenced to death and admitted to Death Row at Holman Prison or West Jefferson Correctional Facility.

Kilby is located approximately five miles east of Montgomery on Wares Ferry Road and encompasses approximately 165 acres of land. The facility sits on ten of these acres and is completely enclosed by a perimeter security fence. Kilby's capacity of 884 inmates is allocated as follows: 621 beds are designated as a reception center for new inmates, returned parole violators, reclassified inmates, and transient inmates. Of these 621 beds, 75 are single cell spaces reserved for inmates requiring segregation. The remaining bed slots are set aside for Kilby's permanent party (160) and the hospital and mental health (103) areas. These beds are contained in four cell blocks, five dormitories, ten trailers, two wards, and various observation rooms and medical holding cells.

SUMMARY OF ACCOMPLISHMENTS

Kilby's Receiving Unit continues to process inmates at an ever increasing rate. During this past period approximately 9,250 inmates were processed through Kilby. This increase of 750 (9%) was handled by the same number of personnel as last year.

Kilby's personnel, both security and non-security, continue to perform their duties in a very efficient manner. Due to the opening of two new institutions a larger than normal amount of inmates were processed through the institution. These people were fed, clothed, classified, and housed with minimum incidents.

INMATE ACTIVITIES

Educational activities at Kilby are going strong. The courses offered by Central Alabama Community College are well attended by permanent party personnel. The institution's first graduate received his degree in graduation exercises recently.

Kilby's athletic teams, while not matching last years record, continued to perform well. They took first place in the State Weightlifting Meet and fielded good teams in other sports. Under the new sports director's leadership next year should be a banner year.

FUTURE ACTIVITIES

Kilby will be undergoing major structural changes in the near future. Plans are already in the works to enlarge the kitchen, build a receiving/laundry facility, construct new housing for the permanent party, and add a court/visiting room. When these projects are complete Kilby will be able to increase its permanent party. This will allow us to accommodate the increased labor requirements of the Print Shop.

LIMESTONE Correctional Facility **ALADOC**

Post Office Box 66
Capshaw, Alabama 35742
(205) 233-4600
(205) 233-1940

Security Level IV
Authorized Staff:
317 Correctional Officers
54 Support Staff

Opened: 1984
Authorized Capacity:
114 protective custody
152 HIV population
38 HIV segregation
1,028 male inmates through medium custody.

HISTORY AND OVERVIEW

Limestone Correctional Facility was officially opened on October 22, 1984. In June 1985, the first medium custody inmates were received. In February 1986, one of Limestone's dormitories was designated as the department's HIV Unit.

In the latter part of 1988, Limestone opened two newly constructed dormitories which brought the facility up to a total of eight dormitories.

The institution is located approximately 12 miles east of Athens and 13 miles west of Huntsville. It encompasses 1,300 acres, 96 of which area inside the compound.

ACCOMPLISHMENTS

Limestone CF provides inmate labor for a variety of local, state and federal governmental agencies. Four (4) bus squads are used to performing various projects in the community such as cleaning trash and rubbish from roadways in Athens and Limestone County. Inmates work at Alabama State Parks on a daily basis keeping the parks clean and performing routine maintenance functions, and working with the Morgan County Highway Department, they help to keep our local highways clean and beautiful. Limestone has also performed special projects for Lawrence, Lauderdale, Marshall and Madison counties. The inmate labor is provided as a public service without cost. Some of the special projects that have been completed include building a solar screen for the Tennessee Valley Authority (TVA) and a retired senior citizens organization, and repairing and remodeling ball field facilities for Limestone county schools. Renovation of several Limestone county schools has saved the county thousands of dollars. Limestone CF has received numerous awards, certificates and letters of appreciation from the American Red Cross, Athens-Limestone Clean Community

Commission, Athens-Limestone Beautification Board, and Crime Stoppers. As a result of the local citizens' requests, Limestone devised a community telephone pyramid system to supplement Limestone escape notification of local residents.

TREATMENT

Assigned psychologists provide group and individual counseling to the inmates. A number of mental health workshops are available to the inmates such as Personal Development, Reality Therapy, Depression, Anger, Values Clarification, Substance Abuse, and Health Use of Leisure Time. The psychologists also coordinate such programs as Alcoholics Anonymous and Narcotics Anonymous. The psychologists interface with the Classification division in reviewing inmates for custody change, institutional transfers, and community based placements. Updated psychological evaluations and testing are accomplished as needed and/or requested. The psychologist visits the segregation unit a minimum of twice weekly and the HIV unit to evaluate and meet the mental health needs of the inmates. A pre-release program is also conducted for inmates being considered for release in the proceeding month. Psychologists also interface with CHC Mental Health professionals to give treatment as necessary.

EDUCATIONAL SERVICES

John C. Calhoun State Community College has sponsored vocational educational training programs at the Limestone CF since October 1985. .Enrollment is maintained at 20 - 30 students per program each quarter. During the 1989 - 1990 academic year Calhoun recognized twenty-one graduates from diploma programs and twelve students who were recognized as having earned an associate's degree and five students who earned their GED and entered vocational training programs.

The Calhoun College programs offered include: auto body repair, automotive mechanics technology, construction trades, design drafting technology, electrical technology, horticulture, prevocational training, upholstery, and welding technology. Student-inmates in these programs participate in a number of live-work activities including community and facility construction projects, repair and servicing of vehicles, upholstery projects, and landscaping for the facility and community agencies.

WINNING

The literacy program Sing, Spell, Read and Write, was introduced into Limestone CF in March 1987. There were eight men in the first class. More went through the program the first year; but due to paroles, EOS's and transfers, the initial graduating class had only seven men. Commissioner Morris L. Thigpen was the speaker at the first graduation. The second graduation was held in March of 1989, and Pat Robertson (CEO of Heads Up Project of the 700 Club) was the speaker. There were 31 men graduating, nine of whom were AIDS patients. The third graduation was held November 2, 1990, there were 20 men graduating, 5 of whom were AIDS patients.

The program (which is not called Winning -- the adult version of the same program) is based on phonics and the men use music to help remember the sounds of the alphabet, vowels, clusters, and blends. There is close to a one-on-one student - tutor ratio, which provides the men the encouragement needed when they are learning something they have never been able to accomplish during their lifetime.

The Winning Program is now under the umbrella of Hope for the Future, Inc., a non-profit, tax-exempt cooperation which was formed to raise funds for the Winning Program.

This program has the potential of being 100% effective if the men stay in the program long enough. Thanks to Warden J. D. White, the men are able to stay at Limestone until they finish the program, unless it interferes with DOC regulations. This program has had excellent cooperation from the community and the local businessmen and women.

RECREATIONAL SERVICES

Limestone CF has an excellent and well-rounded sports department consisting of numerous sport activities such as softball, football, basketball, horseshoes, volleyball, running, dominoes, chess, checkers and weightlifting. The athletic department has developed a physical fitness and recreation program aimed at motivating inmates' participation. Institutional teams consist of the best players in each sport. Each team is set up and monitored by the athletic directors. The teams compete with teams from other institutions throughout the year. Limestone has won various medals and trophies in the competitive sports.

RELIGIOUS SERVICES

A chapel located in the gym is open to the general inmate population daily. Religious services are conducted each day of the week by volunteers from the community and surrounding areas. Activities include Sunday School, Kairos, Prison Ministry, Bible classes and revivals.

LOXLEY
Work Release Center — ALADOC

Post Office Box 1030
Loxley, Alabama 36551
(205) 964-5044

Security Level I
Authorized Staff:
- 6 Correctional Officers
- 5 Support Staff
- 1 Sgt.
- 1 Lt.
- 1 Capt.

Opened: October 1990
Authorized Capacity:
124 male inmates through minimum custody

HISTORY AND OVERVIEW

The Loxley Community Work Release Center opened in October, 1990. The facility is designed to house 124 minimum custody male inmates and is located approximately one mile west of Loxley, Alabama on County Road 64. Once the old Loxley Work Release Site which closed in 1983, the center was completely renovated and now stands as a new modern facility. A much different appearance for a structure that is over 50 years old.

Loxley Community Work Center will provide community service work for state, county, and local governmental agencies. The center will make available between 90 and 95 inmates for governmental agencies. This is a pilot program that will allow agencies to come to the center and check-out work squads. While at work, inmates will be supervised by civilian supervisors.

It is felt that this program will save the DOC money and provide a service to the community.

MOBILE
Community Based Facility ALADOC

2423 North Beltline Highway
Prichard, Alabama 36610
(205) 452-0098

Security Level I
Authorized Staff:
19 Correctional Officers
7 Support Staff

Opened: July 1977
New Dormitory added 1989:
60 male inmates
Authorized Capacity:
150 male inmates in community custody

HISTORY AND OVERVIEW

The Mobile Community Based Facility was opened in 1977. The property was leased until 1988 when it was purchased by the Department of Corrections. Since the property was purchased, a new dormitory has been constructed and the old unit has been extensively renovated. The new dormitory will house a maximum of 90 inmates in community custody. Maximum total capacity for the Mobile CBF is 150 inmates. The dormitory was completed in December of 1989 and Brookley CBF then merged with the Mobile CBF. Expansion of the Mobile CBF was prompted by the anticipation that the Brookley CBF would be closed down as part of a modernization program by the Mobile Aerospace Industrial Complex. The Supervised Intensive Restitution (SIR) Program for Mobile, Baldwin, Clarke, Choctaw, and Washington counties has been combined with the Mobile CBF for the past three years. Expansion of the facility and the merger of Brookley CBF and SIR Programs have been a challenge to the staff. They are to be commended for their performance during the many changes and adjustments.

ACCOMPLISHMENTS

During the year, work release inmates employed by the private sectors earned gross wages totaling $1,006,376.00. The 25% contribution to the state from these wages totaled $251,595.00 and an additional $43,042.00 was reimbursed to the state for transportation costs. Also withheld was $80,009.00 for federal income tax; $19,685.00 for state income tax; and $62,713.00 for social security. Paid from the inmates salaries was $21,563.00 for child support payments; $57,121.00 for restitution, fines and court costs; $26,765.00 for medical treatment; and $69,446.00 for disbursement to inmates' dependents. Approximately 8,136 hours of community service was performed by the work release inmates. Inmates on the SIR program paid to the state $34,596.00 for supervision fees, $25,999.00 was collected from SIR inmates performed 9,530 hours of community service. Approximately 40 inmates participated in Earth Day activities. Over 300 bags of trash were removed from the highways in Mobile County by those inmates.

TREATMENT

Inmates assigned to this facility have available to them an in-house basic education program conducted by the Mobile County School Board. Inmates who maintain good institutional records and show a desire to be successful after being released from prison are allowed to attend local colleges, trade schools and participate in the pass/leave program. Also, a self-help program for Narcotic and Alcohol Anonymous is available and several free-world persons from the local communities assist the inmates with this program. Deserving inmates are allowed to attend NA/AA programs outside the facility with sponsors. Other treatment programs include religious services, recreational activities, and drug testing. Drug/alcohol testing has successfully reduced the number of inmates using drugs and alcohol.

CONCLUSION

The Mobile CBF staff is looking forward to improving our community relations, job marketing, and inmate programs. We look forward to the challenge of reaching the goals set for our inmate population, staff and physical plant.

MONTGOMERY
Community Based Facility

ALADOC

Post Office Box 75
Mt. Meigs, Alabama 36057-007
(205) 271-2300 (ext. 306)

Security Level I
Authorized Staff:
19 Security Staff
7 Support Staff
3 SIR Officers

Opened: 1976
Authorized Capacity:
180 male inmates and 24 female inmates in community custody

HISTORY AND OVERVIEW

Montgomery CBF was originally opened in March 1976 and housed in trailer units, adjacent to Kilby Correctional Facility off Wares Ferry Road.

In July 1989 the unit moved into a modern facility at the same location, which consists of 12,000 square feet of living area with separate dormitories for the male and female inmates.

The administrative offices, kitchen and dining areas are located in a building of 6,000 square feet.

ACCOMPLISHMENTS

MONTGOMERY COMMUNITY BASED FACILITY	FISCAL REPORT YEAR-TO-DATE	NOV. 6, 1990 SINCE INCEPTION
Total Gross Salaries Paid	$1,167,900.77	
Federal Income Tax Withheld	$ 88,413.40	$145,345.00
State Income Tax Withheld	$ 23,199.69	$ 38,125.69
Social Security Withheld	$ 76,725.01	$125,559.31
Amount Paid To DOC	$ 291,981.72	$489,467.00
Disbursed To Dependents	$ 72,149.30	$125,740.12
Restitution/Civil Clms. Pd.	$ 57,729.75	$ 79,683.07
Court Order Child Support	$ 9,548.79	$ 16,502.30

The Montgomery CBF inmates maintain full-time employment. The inmates have contributed over 30,000 hours of free-labor to the community. Inmates are paid minimum or prevailing wages; and these jobs are within the free community.

EDUCATION

Inmates housed at Montgomery CBF are given several alternatives for furthering their education. These alternatives are as follows:

1. ABE/GED classes are taught weekly.
2. TECHNICAL TRAINING - local trade schools such as John Patterson, Trenholm Trade, Coastal Training Institute, and Job Placement Training.
3. COLLEGE - college courses are extended for those inmates that qualify and are enrolled in local institutions.

The inmates are encouraged to further their desires and careers by participating in the opportunity to attend these institutions of higher learning.

SECURITY

Montgomery CBF maintains precautions at all times. During each shift at least three (3) head counts are conducted. To insure that each inmate at the Work Release stays drug and alcohol free, random unannounced urinalysis and breath tests are given. For those who test positive, alcohol and drug counseling is mandatory. Shakedowns are conducted daily by correctional officers to ensure that no unauthorized items are brought into the facility.

Periodically, officers visit the job site of the inmate to check the inmate's progress and attitude. The performance of the inmate's work ability and conduct while at their job is discussed with the inmate's immediate supervisor.

BASIC OPERATIONS

Montgomery CBF is designed to assist inmates to become gainfully employed in order to become financially secure and gain an appropriate work ethic. The program seeks to instill in the inmates that they should become law-abiding, productive citizens upon returning to their communities within the free world.

RED EAGLE
Honor Farm

Route 3, Box 79
Montgomery, Alabama 36110
(205) 242-2510

Security Level II
Authorized Staff:
24 Correctional Officers
9 Support Staff

Opened: 1972
Authorized Capacity:
225 male inmates in minimum custody

HISTORY AND OVERVIEW

After having been closed for many years, the Red Eagle Honor Farm was reopened in 1972 as a Work Release Center and a farming operation. In 1975 - 1976, the institution was remodeled and today consists of two dormitories housing 225 minimum security inmates.

OPERATIONS AND SERVICES

Red Eagle is primarily a farm operation, but approximately 100 inmates are assigned to other state agencies in the Montgomery area which have contracted for inmate services. These inmates earn a total of $246 per day for the General Fund. An additional 34 inmates are assigned to the Industries Division and work in constructing and remodeling buildings for the state. Various projects have been completed this year which enhance the appearance of Red Eagle. The roof line was extended to provide cover for the entrance. The kitchen has been provided with a walk-in freezer-cooler, a serving line, a stove, and a dishwasher.

EDUCATIONAL SERVICES

Adult Basic Education (ABE) classes are available for any inmates who desire to participate. Inmates having less than a high school education are encouraged to seek GED certification. Red Eagle has established a Quality Food Class.

RELIGIOUS SERVICES

A chaplain from Tutwiler Prison provides religious services for inmates at Red Eagle Honor Farm. Ministries from various faiths conduct services on a regular basis. A chapel fund has been created, and plans are underway for a chapel at Red Eagle.

RECREATION

Activities include basketball, softball, and baseball during their respective seasons, and teams from other institutions in the area periodically visit. Weightlifting equipment is available, and an area is provided for inmates to work hobby crafts.

STATON
Correctional Facility ALADOC

Post Office Box 56
Elmore, Alabama 36025
(205) 567-2221
(205) 567-0704 (FAX)

Security Level IV
Authorized Staff:
125 Correctional Officers
38 Support Staff
163 Total Authorized Staff

Opened: 1978
Authorized Capacity:
689 male inmates through medium custody

HISTORY AND OVERVIEW

Staton Correctional Facility was opened in June 1978. The site is about one-tenth square mile in area and is monitored by officers in three towers. Inmates are housed in four identical dormitories with a total capacity of 468 for these four dorms. There is one dormitory designated as an Honor Dormitory which has a capacity of 53. The new dormitory constructed in 1989, has a capacity of 168, thus giving a new increased capacity at Staton of 689 at the present time.

There are approximately 218 inmates involved in agricultural type work outside the institution. Inmates assigned to facility support activities total 246. Additionally, approximately 216 inmates are participating in vocational training. There are approximately 55 inmates who are participating in pre-vocational and GED preparatory training. Also, there are a number of inmates who participate in day and evening college courses offered by Central Alabama Community College.

The personnel staff at Staton consists of 125 correctional and 38 support personnel.

ACCOMPLISHMENTS

Staton continued to enjoy a significant reduction in both inmate disciplinaries and grievances although there was an increase in capacity of 48 inmates during the past year. This can be attributed to the constant emphasis in security, counseling and rehabilitative measures.

Additionally, to improve the overall communication process between the security staff and the inmate population, the warden implemented a program called "Warden's Time". On each Tuesday from 3:30 p.m. - 5:00 p.m., the warden will see the first 15 inmates who desire to see him regardless of topic. Further, each Thursday from 3:30 p.m. - 5:00 p.m., the assistant warden will see inmates under the same criteria. This is a special program wherein inmates are seen up and beyond those seen by the staff as a matter of routine. Further, on a monthly basis the warden meets with the Inmate Welfare/Advisory Council. This broadened network of communications at Staton has had a very positive impact on the inmate population.

To continue the improvement of communications within the institution, the warden also implemented an Employee Advisory Council made up of Correctional Officer I's from each team and selected support personnel. This council meets monthly and provides another avenue for the Correctional Officer I's to communicate with the warden. Also, a weekly staff meeting is held with supervisory personnel. In addition, the Warden, Assistant Warden and Captain continue to have an open door policy to further strengthen this communication flow. As a result, the majority of problems are solved informally, thus reducing the number of employee grievances. It should be noted that only two employee grievances went to Level III for resolution this fiscal year.

Inmate activities supported by outside "free world" volunteers continued to increase this year. The Staton chapel program has 22 different organizations and an average of 115 volunteers who donate approximately 519 hours monthly. The SAVIC Chapter has approximately 60 members who are assisted by five volunteers for nearly 20 hours per month. There are approximately 128 inmates involved in the AA/NA program. Two volunteers donate approximately 16 hours monthly. The Muslim community is supported by six volunteers and 40 hours monthly. Lastly, the Native American community is supported by four volunteers who donate approximately 16 hours monthly. In summary, the volunteer support from "free world" personnel has had a very positive impact on our inmate population. Plans are to continue this with increased emphasis. The total volunteer support at Staton consists of approximately 132 volunteers who denote approximately 611 hours monthly.

Emphasis on security has continued to be top priority within the institution. Although there was an increase in inmate capacity, Staton CF enjoyed another escape-free year.

ST. CLAIR
Correctional Facility ALADOC

1000 St. Clair Road

44 Support Staff

Opened: June 1, 1983
Authorized Capacity:
1,032 male inmates in close, maximum, medium and minimum custody

---

HISTORY AND OVERVIEW

The St. Clair Correctional Facility is located approximately 35 miles northeast of Birmingham and was built at a cost of approximately $29,000,000.00. The site includes 600 acres, 35 of which are within the fenced perimeter. The inmate population is housed in 864 two-man cells and 168 one-man cells.

ACCOMPLISHMENTS

St. Clair is the first maximum security prison in the nation to employ the "Therapeutic Community Concept". The Community houses 48 inmates who currently have, or have had a drug abuse history. The community provides a drug-free environment emphasizing a new, positive outlook on the part of the inmate. The immediate aim is building trust, honesty and respect in the participating inmate. Selected inmates must meet certain eligibility criteria and are granted certain special privileges. The ultimate goal is to establish a drug-free life style for the inmate. In addition to the first two DOC therapeutic counselors working with the aforementioned 48 inmates, within the past several months two additional counselors were hired whereby four counselors will be working with 96 inmates in the expanded Therapeutic Dormitory/Community.

St. Clair has constructed a Sallyport "shakedown shack" which is used for inmate control and security. St. Clair has had many community projects, one of which was the Ragland High School where bleachers and bathrooms were built in the football complex, a barbecue grill was built for the concession stand, and a parking lot was created. Further security measures included the erection of three "mini-towers" to afford security personnel a better visual observation of St. Clair's enclosed portion for prisoners. One of the staff duplex houses was painted.

St. Clair has a very active and effective dog team. Handlers received special training through various seminars. During the preceding 12 months, St. Clair experienced no escapes. The dog handlers have instructed in seminars for such groups as the FBI, New York Sheriff's Association, North America Search Dog Association, and the National Police Bloodhound Association. To date, the Dog Team has responded to 13 calls, with 7 apprehensions or finds. The facility team sponsors "K-9" seminars, at St. Clair, and has had 43 people from several states attend same.

Ninety percent of the kitchen/hallways/break room acoustical ceiling has been replaced by a tamper-proof metal ceiling which should virtually eliminate the potential areas for kitchen inmates to conceal stolen food stuff items in the ceiling section.

In May 1989, St. Clair went on the new automated computer system to process inmate PMOD, visitation, job assignments, receiving, accounting, Canteen sales, and bed assignments. This computer system has resulted in great time-savings for the staff at St. Clair, plus modernizing our facility.

EDUCATIONAL

Gadsden State Community College serves approximately 250 inmates at St. Clair. Courses offered include quantity food preparation, electricity, welding, and furniture refinishing. The program is currently staffed by a director and seven instructors. St. Clair also began college classes in May 1989, and currently has 93 people enrolled. Gadsden State Community College also has 151 people enrolled in technical college and related classes. Within the last year, 28 inmates have received their GED certificates; additionally, 20 more are scheduled to take the soon-to-be-held GED test.

RELIGIOUS SERVICES

The Kairos in-prison ministry conducts two four-day sessions per year, two institutional reunion sessions per year, two retreat sessions per year, and 12 Ultreyra per year. Also provided were various seminars, inmate prayer services, volunteer worship services, Bible classes, Sunday School, Catholic worship, Jehovah's Witnesses services, and Islamic classes and prayers. St. Clair is fortunate in having sufficient volunteer preachers and evangelists who conduct services throughout the week. The weekend of May 25-27, 1990, the facility hosted the "Bill Glass Total Person

Weekend" with much success and inmate participation.

TREATMENT/SOCIAL SERVICES

The Treatment staff consists of one full-time, State-licensed psychologist, two part-time contract licensed psychologist, and one full-time DOC Master's level therapist. Services include, but are not limited to: crisis intervention; evaluation and treatment, i.e., psychological testing; individual and group psychotherapy of acute and chronic mental disorders; preparing reports for such agencies as the Board of Pardons and Paroles, Vocational Rehabilitation Service; and, providing psychological recommendations to the Classification division. The facility holds group classes for "Pre-Release" eligibles as occasion demands. In addition, rehabilitative classes or workshops are conducted for Substance Abuse, Personal Development, AA, NA, etc. An active Alabama Volunteers in Corrections Chapter holds two meetings monthly, and one meeting has an outside speaker(s).

RECREATION

The facility's exercise yard and gym are open daily for basketball, handball, volleyball, jogging, weightlifting, supervised boxing, horseshoes, and a variety of table games. Leather and wood craft shops are also opened at scheduled hours. For inmates assigned to work squads, institutional jobs and trade schools, the exercise yard and gym are made available during evening hours. Intramural sports are part of the recreational program and St. Clair sports teams have travelled to other prisons for competitive tournaments as well as having hosted tournaments at this institution.

MISCELLANEOUS

In the Correctional Health Care (CHC) - operated Infirmary, a dialysis section was established and currently treats four inmate patients.

Route 1, Box 33

Security Level V
Authorized Staff:
117 Employees
89 Correctional Officers
28 Support Staff

Opened: December 1942
Authorized Capacity:
622 female inmates in maximum, medium and minimum custody

HISTORY AND OVERVIEW

Until the late thirties, women and men were housed in the same prison. Miss Julia Tutwiler, a noted educator in Alabama, visited that prison and was appalled at the conditions which existed.

Miss Tutwiler began a campaign to have a separate unit for women. Construction began in 1941; the prison opened in December 1942. It was named in honor of Miss Tutwiler.

At that time Tutwiler consisted of one building, referred to now as the main building. The physical shape and square footage of that building has not changed, except for the addition of a 12-unit single cell housing area added in 1985. Over the years the building has been painted and renovated and inside space has been changed and reallocated.

The Tutwiler complex now consists of five buildings; main building, chapel, clothing factory, and two minimum security housing units.

The main building houses the administration offices; classification and treatment; kitchen; dining room, which also serves as an auditorium; business office; canteen; a 14-cell segregation unit; five death row cells, a five-room suite for an isolation unit; a 15-bed infirmary; and nine dormitories. Inmate capacity is 494.

Four of the nine dormitories are for designated groups: Dorm 5, a substance abuse treatment community; Dorm 6, Honor Dorm; Dorm 8, Receiving; and Dorm 9, Longtimers (15-year sentence or more).

The chapel, located in the north yard, was completed in 1984. Dorm 5 now occupies the area which was the chapel.

In 1985 the clothing factory, which did occupy the space which is now Dorm 9, was moved to the metal building in the south yard.

Two minimum security units, each housing 64 inmates, were completed in April 1989. The minimum security units are part of Tutwiler but are designated as the Edwina Mitchell Center. Edwina Mitchell was the first female to be appointed as a warden in Alabama.

When a female is convicted of a felony charge in Alabama, she is transferred from the county jail to Tutwiler. When admitted she is given a Cuprex treatment to kill any body lice. She is fingerprinted, photographed, and assigned a bed in the Receiving Unit. An inmate remains in the Receiving Unit until medically cleared to move into population, usually about two weeks.

While in the Receiving Unit the inmate is oriented to the rules and regulations of DOC and the institution, and to the programs available at Tutwiler or through J. F. Ingram Technical College and Central Alabama Community College. The orientation includes extensive information on the HIV virus and AIDS.

When an inmate is released into population she goes before two boards: one for custody review and one for a job assignment. Jobs available for inmates include institutional jobs (housekeeping, yard, laundry, maintenance and canteen); community projects and services, J. F. Ingram Trade School, which includes the kitchen; and Correctional Industries (data entry and factory).

J. F. Ingram operates under the State Board of Education, Post-Secondary Division. Classes are offered in the following vocational skills: cosmetology, business and office education, communication electronics, commercial sewing, electronic office machine repair, floral design, welding, building trades, automotive specialities and data processing. Educational classes are also provided for related studies for each vocational skill, Adult Basic Education (ABE), and preparation to take the GED exam. Since October 1989, 19 inmates have received their GED through J. F. Ingram.

The clothing factory and the data entry plant are operated by Correctional Industries. Each operates two shifts a day, five days a week. Ninety-one inmates are employed in the clothing factory; 23 are employed in the data entry plant. The pay scale, which is based on work performance, ranges from 15 to 25 cents per hour. The factory makes clothing and linens for all inmates in Alabama correctional institutions. The data entry plant does contract work for other state agencies, entering non-classified material only.

The only jobs for which wages are paid are those provided by Correctional Industries. However, each inmate receives $1.00 a month as "state pay" or "state draw", paid by the Alabama Department of Corrections.

An inmate is not allowed to have money in her possession. Each inmate has an account in the business office. All monies received, including the wages and the "state pay" noted above, are credited to the inmate's account. Expenditures by the inmate are debited from her account. These expenditures may be through mail order craft shops, publishing companies, or weekly orders from the canteen. Maximum amount spent through the canteen is $40.00 a week.

An inmate is employed in meaningful work eight hours a day, five days a week. During her "free time" a variety of activities are available:

1. Central Alabama Community College offers classes Monday through Friday, 3:30 p.m. to 9:00 p.m., for each inmate who has a high school diploma or a GED. This is an accredited program in which inmates can work toward an Associate Degree in Arts or Sciences. These degrees are geared for college transfer to senior colleges and universities. If the inmate is at Tutwiler long enough to earn the Associate Degree, she will be permitted to participate in the graduation ceremony held at the main campus in Alex City. Eight Tutwiler inmates have graduated from this program since October 1988.

2. Religious activities are coordinated by the chaplain, assisted by volunteers from the We Care Ministry. These activities include one-on-one counseling, chapel services, a handbell choir, a choral group, Bible study, Laubach training (a literacy program), and the provision for quiet time, to include listening to tapes.

3. Recreational activities are planned and coordinated by the recreational director. Activities include arts and crafts, softball, baseball, volleyball, horseshoes, weightlifting, board games, bingo, and theatrics.

Medical care, dental care and eye care for inmates is provided through contract with Correctional Health Care (CHC). Medical personnel staff the nine-room Health Care Unit and infirmary 24 hours a day. CHC arranges for specialized care and/or hospitalization, including OB/GYN needs, through area doctors and hospitals.

A pregnancy test is given to each inmate when received. Prenatal care begins immediately for those who are pregnant. Prior to delivery, arrangements are made for the inmate's family or a representative of the Department of Human Resources to receive the baby from the hospital.

An inmate who maintains contact with her family adjusts better in prison. This contact may be through correspondence, telephone calls and/or visits. Visitation is every weekend, 7:00 a.m. to 1:00 p.m.

The second Saturday of each month is set aside for special visiting between inmate mothers and their children. The visit and transportation is provided by Aid for Incarcerated Mothers (AIM).

It is the goal of the staff at Tutwiler to assist each inmate in reaching her potential, increasing her self esteem, and returning to the society better equipped to deal with the problems she will encounter. This is attempted through individual counseling, mental health workshops, substance abuse programs, and group workshops for personal development and pre-release.

Security Level IV
Authorized Staff:
163 Correctional Officers
65 Support Staff

Opened: August 5, 1990
Authorized Capacity:
600 adult male inmates in minimum through medium custody

HISTORY AND OVERVIEW

Ventress Correctional Facility is a newly constructed minimum-medium (Level IV) prison located in Barbour County, Clayton, Alabama, 65 miles southeast of Alabama's capitol of Montgomery. This facility was completed in April of 1990. It is located on 103 acres of land with 26.83 acres inside the perimeter fence. The countryside in the vicinity of the Ventress CF is hilly timber and farm land. Wooded areas are largely covered with dense underbrush which affords an excellent habitat and concealment for wildlife.

Ventress is a campus design, 600 bed, male facility. The facility is conducive to the atmosphere needed for a drug treatment center. It consists of five dormitories which house 120 men each. The dorms are 11,113 square feet. Each dorm has four bays. Two bays can house 25 men each for initial intensive treatment, and two bays of thirty-five men each for after care. Excellent classroom space is available within these buildings as well as private office space for drug counselors when individual counseling is needed. The center of the buildings contain a cubicle for a correctional officer to give him/her total vision of the showers, bathroom, classroom, TV, hobby craft, and sleeping area.

There is a total of 156,415 square feet under roof inside the facility. This includes large office spaces for administration, hospital area, large family visitation room, chapel, five dorms, multi-purpose recreation building, laundry, law library, mailroom, kitchen, three dining rooms, large educational building and two industry buildings. A 5,680 square foot, air conditioned visitation muster building with an easy access entrance, is available six days per week for other agencies and individuals to enter and conduct support seminars and other programs to enhance and support the drug treatment program.

The entire facility will be devoted to drug treatment. Transfer vans are available to move inmates to a facility 20 miles south for administrative and disciplinary segregation. A facility is located 22 miles northeast for mental health treatment if needed.

The major city is Eufaula located 20 miles to the East. Major highways through Eufaula North and South is U. S. 431 and East and West is U. S. 82. Alabama Highway 30 connects Clayton and Eufaula.

SUMMARY OF ACCOMPLISHMENTS

Since opening on August 5, 1990 the Ventress CF, through cooperation with the Sparks Technical College, has implemented an Adult Basic Education (ABE) program. The first Drug Treatment class of fifty inmates began on October 15, 1990 with a second class of 50 inmates scheduled to begin on October 29, 1990. On October 22, 1990 the Personal Development Program was implemented and the pre-release program was also implemented on October 22, 1990. At the present, work has begun to complete the industrial complex at Ventress where the chair factory and Latex Paint factory will be located.

The major accomplishment during 1990, for the Ventress CF, was the amount of new correctional personnel, support personnel and drug counselors that were hired and trained. During this short period of time an extensive Standard Operating Procedure (SOP) was written and has been published.

(205) 436-3399 (FAX)

Security Level VI
Authorized Staff:
307 Employees
259 Security
47 Support

Opened: October 15, 1982
Authorized Capacity:
1,352 male inmates in minimum, medium and maximum custody

HISTORY AND OVERVIEW

West Jefferson Correctional Facility, located in Oak Grove, Alabama opened on October 15, 1982. At that time, WJCF began housing 600 male inmates in open dormitories. The cell blocks and administrative areas of the institution were still under construction. The complete structure opened on March 2, 1984 with additional bed space for 1,104 inmates to make the total capacity 1,704. Later two dormitories were converted to Correctional Industries. Today's current capacity is 1,352 inmates. West Jefferson includes 468 acres of land with 68 acres enclosed by a security fence.

West Jefferson houses multiple offenders and certain first offenders deemed not appropriate for youthful offender facilities.

The primary function of the facility is the housing of offenders in all custodies with emphasis on educational programs. However, offenders serving time for multiple violent crimes; inmates classified in close custody or maximum custody; inmates placed in segregation; and inmates with Life Without Parole sentences are also confined at WJCF. Certain death row inmates are also housed at West Jefferson.

West Jefferson is the largest correctional institution in the State of Alabama.

COMMUNITY PROJECTS

The classification of inmates has changed at WJCF during the past years. Utilization of the facility as a maximum security institution has resulted in the curtailment of all community projects.

Several area schools still benefitted from inmate labor as numerous requests were received from officials requesting inmates to upgrade ball parks, perform general cleaning, perform some maintenance, and clear school grounds of weeds and trash and painting of school classrooms. State parks, state schools, and other state agencies benefitted from general labor of inmates assigned to WJCF as well.

VOCATIONAL PROGRAMS

There are seven vocational programs available to inmates: quantity goods, barbering, carpentry, drafting, electricity, masonry, and plumbing. There are approximately 120 inmates enrolled in these courses. The classes of drafting, masonry, carpentry, plumbing, and electrical join together in a project to actually construct a modern house at the school.

MEDICAL

Starting November 20, 1988, Correctional Health Care (CHC) began providing care for all Department of Corrections inmates including sick calls, diagnostic services, dental care, surgery, and psychiatric services. Chronic care clinics are held weekly for a variety of long term medical problems. WJCF is currently the base of all the system's diabetics. A Health Care Video Library has been established for inmates and staff on the major health problems in our society. Quality Review and Quality Assurance meetings are held every 90 days to inform staff of current and long term medical problems and solutions.

MAINTENANCE

Although West Jefferson is one of the newest penal institutions in the Southeast, we are constantly considering and implementing new construction projects to improve the appearance of the work place. WJCF is the largest institution in the state, and along with its size comes many large maintenance problems. To combat the problems WJCF has incorporated a preventive maintenance system. The use of P.M.S. will decrease down time on all equipment. This system will not only insure longer life of equipment but will result in reducing the cost to operate this large penal institution.

FOOD SERVICES

West Jefferson prepares about 4,056 regular meals a day for personnel and inmates and 384 diabetic meals a day. They follow a menu plan which is drawn up by a registered dietician. Special snacks are prepared for diabetic inmates who take insulin to control their disease.

WJCF has four Steward II's and three Steward I's, with three shifts working from 12:00 a.m. to 7:00 p.m. The kitchen is open about 19 hours per day.

West Jefferson's bakery provides bread for Birmingham Work Release and East Thomas Work Release.

TREATMENT

Treatment if provided for mental health/psychiatric problems, substance abusers, and sex offenders. Both individual and group psychotherapy, along with psychoactive medication (from CHC), are used in mental health treatment. Sex offenders and substance abusers are treated through the use of workshops and videos developed and provided by the Treatment Division of the Department of Corrections. Prison based AA and NA groups augment this treatment regimen.

EDUCATION

The Adult Basic Education (ABE) program at WJCF is administered by Lawson State Community College. Classes are available for inmates from grade one through grade 12. There are approximately 100 inmates enrolled in these classes. Graduations are held twice each year.

PSYCHOLOGICAL

Through its own institutional staff and through interface with the contract medical/psychiatric services provider, inmates at WJCF are provided mental health appraisal and treatment. In addition, institutional psychology staff interact on a consultative/participative basis with the institution's classification specialist to provide inmates with a special or annual progress reviews. Additionally, they provide assessment of special needs for inmates who may need to be transferred to other correctional facilities. The psychology service also provides placement for training and experience for doctoral level students from the University of Alabama.

RECREATION

The recreational program offers a wide range of activities such as intramural competition, softball, basketball, flag football, volleyball, handball, weightlifting, table games, horseshoes, table tennis, track and VCR movies. WJCF has two indoor gyms that allows recreational activities year round.

RELIGION

Religious services are provided for the general inmate population and for those inmates assigned to the segregation units. A full-time chaplain as well as three volunteer part-time assistants are available.

Religious events such as morning Bible classes, prayer services, afternoon worship services, and personal Bible study time are scheduled in the chapel each day. This is followed by evening worship services. Other volunteers (missionary groups, churches, outreach ministries, prison ministries and ministers) minister to the inmates.

ALABAMA DEPARTMENT OF CORRECTIONS

FUNCTIONAL SYNOPSES

DEPUTY COMMISSIONER
FUNCTIONAL SYNOPSIS

The Deputy Commissioner is appointed by the Commissioner with the concurrence of the Governor. As Deputy Commissioner he is responsible to assist the Commissioner in the daily operation of the Department of Corrections. He oversees the Research, Monitoring and Evaluation (RME) Division of the department. Additionally, he has prime responsibility in providing the link between the Legislature and the department during the legislative session.

ASSOCIATE COMMISSIONER FOR ADMINISTRATION
FUNCTIONAL SYNOPSIS

The Associate Commissioner for Administration oversees all aspects of the Personnel, Training, Accounting, Institutional Services, Procurement, Engineering Administration, Employee Grievance, and Data Processing Divisions.

ASSOCIATE COMMISSIONER FOR INDUSTRIES
FUNCTIONAL SYNOPSIS

The Associate Commissioner of the Alabama Correctional Industries is responsible to insure that the overall objectives of Industries are accomplished. These objectives include providing meaningful work with jobs that teach marketable skills; providing cost effective top quality products and services to tax supported agencies within Alabama; and operating a program that is self-supporting.

Correctional Industries operates 28 manufacturing and service plants which are located at 11 correctional facilities. Each plant is operated and managed in accordance with prevalent business practices in its respective industry.

ASSOCIATE COMMISSIONER FOR INSTITUTIONS
FUNCTIONAL SYNOPSIS

The Associate Commissioner for Institutions is responsible for the functional operational of all facilities housing inmates (major institutions, minimum security/trustee camps and work release) and the SIR Program, and to insure that this trust is carried out in the most effective manner possible.

ACCOUNTING DIVISION
FUNCTIONAL SYNOPSIS

The Accounting Division is charged with the responsibility of developing, updating, and promulgating all accounting policies and procedures for the Department of Corrections including the central office, support units, and facility level accounting activities. Accounting responsibilities within DOC are distributed among five basic functional areas including General Accounting, Budgeting, Accounts Payable, Internal Auditing, and Property Control.

General Accounting comprises the maintenance of accounting records, the recording of necessary journal entries, grants management, control of credit cards, and the preparation of departmental financial statements and reports. Other responsibilities include answering questions and providing information regarding accounting policies and procedures, and for procuring a notary bond for any departmental employee who serves as a notary public for the Department.

The Budgeting function includes the preparation of the departmental budget. Within this budgeting process is the responsibility of providing assistance to the subunits within the department in the preparation of unit budgets. The unit budgets, once consolidated, comprise the total budget for the Department. The budgeting function further includes the periodic comparison of actual activity with budgeted, compilation of information for the State Budget Office, the State Finance Director, and the Legislative Fiscal Office. A current Operations Plan and other financial projections and reports must be developed and maintained current in order to advise the Commissioner, Associate Commissioners and other departmental managers so that financial decisions may be made based upon a current knowledge of the Department's financial condition.

Activities of the Accounts Payable area are varied. It is within the Accounts Payable function that requisitions are encumbered, necessary changes are made to purchase orders, payment vouchers are generated for construction and renovation contract payments, management reports are compiled regarding those contract payments, vouchers are processed to obtain payment for regular purchase orders and non-purchase order items including among other things utilities, personal expense accounts, and personal services contracts. Information is provided upon request regarding the status of payments when so requested by vendors or others.

The Internal Audit function includes the periodic audit of financial activities at the facility level. Also, financial statements generated at the facility level are monitored and consolidated reports compiled for management purposes.

ACCOUNTING DIVISION
FUNCTIONAL SYNOPSIS

continued

Warehousing activities are monitored and reviews are made of the physical inventory process annually at the Department's major warehousing facilities.

The purpose of the Property Control section is to ensure that the Department complies with applicable laws and regulations regarding property acquisition, records maintenance, and disposition of property. The Department maintains a property tracking system whereby the physical location of all controlled property items is known or can be readily determined at all times.

CENTRAL RECORDS DIVISION
FUNCTIONAL SYNOPSIS

The Central Records Division is responsible for maintaining and processing all documents pertaining to those inmates sentenced to the Department of Corrections' custody. The office is comprised of six main sections. These are: Data Entry, Admissions/Identification, Microfilm/Filing, Communications, Releases and the Interstate Corrections Compact.

The Data Entry Section is responsible for entering into the computer information from conviction report transcripts, detainers, cancellation of detainers, restoration of good time, incentive good time recommendations, escapee and parole violator information, waivers and court orders, all general information received from FBI rap sheets, Alabama Criminal Justice Information Center, index cards, fingerprint cards, pre-sentence investigation reports, enemy lists and disciplinaries received from non-terminal institutions.

Approximately 1,311 conviction report transcripts are received each month from the Circuit Court Clerks on inmates. This amount includes initial admissions, recidivists, additional cases and amendments to transcripts. Transcripts are the initial documents received to build the inmate file. They are processed accordingly, and the information entered into the data base automatically assigns the Alabama Inmate Serial (AIS) Number.

The Admissions/Identification Section is responsible for constructing institutional paper files (green files) for all inmates sentenced to the Department of Corrections' custody. For initial admission inmates, this includes the conviction report transcript and the inmate summary sheet and any other information available. For recidivist inmates, any past information regarding sentences, pre-sentence investigation reports and other pertinent information is also included. In Fiscal Year 1990, this section constructed approximately 600 files monthly.

Additionally, this section is responsible for ensuring fingerprint cards and photographs are taken on each inmate, and that this information is processed properly. After the fingerprint cards are completed, two cards are forwarded on each inmate to the Alabama Bureau of Investigation (ABI) who in turn forwards one card to the Federal Bureau of Investigation (FBI). This process generates the receipt of the FBI rap sheet.

Furthermore, this section releases inmates to parole by receiving the parole certificates from the Parole Board, matching the C-80's (release documents) with the

CENTRAL RECORDS DIVISION
FUNCTIONAL SYNOPSIS

continued

certificates, reviewing for detainers, determining inmate's location and forwarding the parole package. After confirmation of parole release, the inmate is unassigned in the computer. In Fiscal Year 1990, an average of 215 paroles were processed monthly.

The Microfilm/Filing Section is responsible for filming and filing all documents received. The primary task of the Filing Unit is to file documents received in inmate add-on files. This amounts to over 2,000 documents daily. Furthermore, this unit retrieves and refiles microfiche jackets and add-on files for Central Records' employees, as well as, Classification, Central Review Board, investigations from Investigations and Intelligence (I & I), ABI, FBI, Attorney General's Office and District Attorneys. Approximately 250 complete inmate files are retrieved and refiled daily.

In November 1989, microfilming of inmates records active and inactive was completed ensuring that all inmates are now on microfiche or roll film. In December 1989, filming of the add-on files began. Add-on files contain additional documents on those active records which are already microfilmed. Approximately 5,200 documents are microfilmed daily by one Reproducing Machine Operator. The Microfilm Unit maintains approximately 160,200 inmate records with 15,074 being active records.

The Communications Section is responsible for issuing all fugitive warrants on escapees and parole violators and entering these wanted persons into the National Crime Information Center (NCIC) terminal. If the inmate is recaptured out of state and refuses to sign a Waiver of Extradition, extradition proceedings are initiated in this section and forwarded to the Governor's Office.

Also, all detainers and warrants lodged against inmates are processed and entered into the data base at Central Records. Inmates are notified that they have a right to a speedy trial. Detainers lodged from out of state are processed through the Interstate Agreement on Detainers whether the inmate or prosecutor request for trial. Approximately 300 detainers and cancellation of detainers are processed monthly.

The Release Section is responsible for reviewing all inmates scheduled for release by end of sentence, probation or court order. This section ensures law enforcement agencies having

CENTRAL RECORDS DIVISION
FUNCTIONAL SYNOPSIS

continued

detainers on state inmates are notified of the inmate's pending release and coordinates with the institution for the inmate's pickup by the detaining agency. Probation Officers of all inmates released to probation under the Split Sentence Act are notified via a form letter. The inmate's institution is contacted to confirm his release. The inmate is then unassigned by respective type in the terminal. In Fiscal Year 1990, an average of 250 releases were processed monthly.

The Interstate Corrections Compact Section is responsible for reviewing and processing those inmates approved for exchange with other compact states. At the end of Fiscal Year 1990, 19 Alabama inmates were assigned to institutions in other states while inmates from other states were serving time in Alabama institutions.

CLASSIFICATION DIVISION
FUNCTIONAL SYNOPSIS

This unit reviews all documentation relative to inmates received by the Department. An initial assessment, based on a battery of psychological tests and a risk assessment instrument is made to determine the: inmate's custody level; institutional/work assignment; educational/training program placement; and the need for counseling, guidance, therapy or special programs. Additionally, each inmate is reviewed for reclassification at least once a year. The unit is also responsible for the transfer of inmates among institutions and ensuring bed space is available. Transportation of inmates has been accomplished with maximum efficiency by planning trips so that buses and vans travel nearly fully loaded in both directions. A total of 26,049 moves of inmates have been made by the transportation unit during the past year. Selection is made and placement arranged for inmates on the Supervised Intensive Restitution (SIR) Program and on Pre-Release Discretionary Leave.

A risk assessment instrument is now being used for determination of security level requirements of inmates. Institutions are rated from I through VI and inmates are matched with the proper institutional level according to their risk assessment scores as approved by the Central Review Board (CRB).

Minimum custody inmates are rated as either minimum-in or minimum-out. Those whose security level is II or below are minimum-out and those whose security level is III or higher may be minimum-in. Minimum-out inmates are those who are suitable for transfer to level II facilities such as Red Eagle Honor Farm and may work at any jobs assigned by institutional job boards either inside or outside the institution. Supervision may be provided by free world work supervisors or non-law enforcement supervisors. Minimum-in inmates must be supervised by Department of Corrections' employees, correctional officers or law enforcement personnel. A change to minimum-out or transfer to a level II facility requires Central Review Board approval.

The advantages of these changes are that there is a standardized scoring system for all inmates which improves the consistency of classification decision-making. Inmates are on the same basis for decision-making regardless of where their classification is being handled. This system also allows better use of available space and provides information about the kind of space we should expect to need in the future

New computerized classification summary forms have been developed at ROCC which greatly facilitates the massive

CLASSIFICATION DIVISION
FUNCTIONAL SYNOPSIS

continued

intake of inmates from county jails. In-service training on the proper scoring of risk assessment and other classification procedures has been provided in each of three regions of the states.

Because of the large net increases in inmates sentenced to the Department of Corrections, we have been unable to keep up with their intake from county jails. However, we have received 4,704 new inmates from the county jails and they have been classified by permanent placement throughout the system.

DRAPER RADIO SHOP
FUNCTIONAL SYNOPSIS

At the present time, the Communications Engineering Division operates one Radio Shop located in the Staton/Draper Complex. Communications Engineering Division is a part of the DOC Central Office and under the authority of Associate Commissioner Ron Sutton. The use of two-way radios is a security measure in the best interest of safety to inmates, employees, and the public.

Communications Engineering is responsible for the design and construction of tower/antenna systems and site locations; the selection, purchase, testing and repair/modifications of portable/mobile/base station two-way radios; the repair audio equipment, closed-circuit video equipment, desk telephone sets, electronic sirens, and other equipment.

The Radio Shop also schedules vehicles for the removal or installation of two-way radios and cellular telephones.

We work with other state agencies in the planning of statewide radio communications systems, up-grading to better radio equipment, and schooling of technicians in electronics.

ENGINEERING DIVISION
FUNCTIONAL SYNOPSIS

This engineering administration has been assigned the responsibility of all phases of the physical plant functions in DOC. This includes hiring architects, directing new facilities designs, awarding contracts, supervising construction, approving pay requests, and approving the finished facility.

Additional duties include providing technical assistance to each institution on repairs and/or replacement of components which have failed through fair wear and tear or from physical abuse by inmates.

There is a staff consisting of our people assigned to these duties including the Correctional Maintenance and Construction Director, his assistant, and a clerical staff of two people. Additionally, there are three technical staff members assigned to this department to assist the institutions in installation and maintenance of their heating and refrigerator equipment, and electronics equipment.

CORRECTIONAL GRIEVANCE AND LIAISON DIVISION
FUNCTIONAL SYNOPSIS

This division serves as an umbrella for several varied functions:

1. The Inmate Grievance procedure is a problem-solving mechanism which focuses on fact-finding and decision-making processes, and has the power to mediate in appropriate cases.

2. Library Services within the Alabama Department of Corrections officially came into being in February 1989, with the signed agreement between Commissioner Morris L. Thigpen and the Alabama Public Library Service (APLS), sub-grantor of a $25,000 Library Services and Construction Act (Title I) Grant. Formally known as the Alabama Prison System's Library Services Project, it was created in response to a need to provide organized, comprehensive library and information services to the inmate population of Alabama. The annual grant and local monies support a detailed plan to establish facsimiles of small, public libraries in five adult correctional facilities per year. In doing so, the inmates will receive access to library materials which promote rehabilitation, education, leisure reading, music therapy and literacy. The Correctional Library Services Coordinator is a trained librarian with a degree in Library Science and has a monumental task to accomplish the goals of the Alabama Prison System's Library Services Project.

3. Literacy Services is also another function under the Grievance and Liaison Division. Easterling CF has been designated the educational or literacy institution and this division provides major support services for this pilot project. Support services for other literacy projects are provided by this division.

INVESTIGATION & INTELLIGENCE DIVISION
FUNCTIONAL SYNOPSIS

The Investigation and Intelligence Division reports daily to the Commissioner of the Department of Corrections and bears the primary responsibility for investigating all criminal acts occurring within the department. The division is responsible for the reporting results of criminal investigations to the Commissioner of the Alabama Department of Corrections and the appropriate district attorneys having jurisdiction as required by state law. The division is also responsible for investigations of internal affairs cases (relating to serious administrative violations) when instructed to do so by the Commissioner or upon the approval of the Commissioner if the request is made by a Deputy Commissioner, an Associate Commissioner, Warden, etc. The Investigation Division is also responsible for staff security in the department, advising wardens and others on security matters. The Investigation Division routinely collects intelligence information concerning drug users, employee misconduct, or any other matter which could adversely affect the security of an institution. The Investigation Division is also responsible for the control of all weapons for the department. The investigations on applicants for the department per request of the Personnel Division. The Investigation Division coordinates with all outside law enforcement agencies on investigations which involves the Department of Corrections.

INSTITUTIONAL COORDINATORS
FUNCTIONAL SYNOPSIS

The Institutional Coordinator's office has supervisory responsibilities over wardens/work release directors in the institutions/work release centers in the state and are divided into two regions -- North and South. Each region is supervised by an institutional coordinator. The regions and institutions included are listed below.

Northern Region: (Roy Hightower)

Hamilton A & I
St. Clair CF
Farquhar State Cattle Ranch
Elmore CF
Staton CF
Birmingham CBF
Hamilton CBF
Childersburg CWC
Limestone CF
West Jefferson CF
Draper CF
Frank Lee YC
East Thomas CBF
Decatur CBF
Alex City CBF

Southern Region: (Willie E. Johnson)

Bullock County CF
Fountain CF
Easterling CF
Kilby CF
Red Eagle Honor Farm
Elba CBF
Montgomery CBF
Loxley CWC
J. O. Davis CF
Holman Prison
Ventress CF
Tutwiler Prison
Camden CBF
Mobile CBF
Atmore CBF

Since the Supervised Intensive Restitution Programs (SIR) are operated from the work release centers, they also come under the supervision of the institutional coordinators.

SPECIAL PROJECTS

Reviews disciplinary appeals, checks for due process violations and makes a decision to either grant or deny the appeal based on information submitted by Warden, Hearing Officers, Arresting Officer and inmates. Types letters to inmate informing him/her of decision over Commissioner's signature and distributes copies to Wardens, Central Records and Pardon and Parole.

Meets with inmate families to determine problems and or questions. Listens to areas of concern and responds to specific situations.

Works as coordinator between institutions and Grievance Division, gather information needed for Grievance Officer to

INSTITUTIONAL COORDINATORS
FUNCTIONAL SYNOPSIS

continued

respond to grievance.

Works with employee drug testing program for the Department of Corrections. Gets computer print-outs with names of employees to be tested and ensures all are tested in a timely manner.

Reviews Administrative Regulations making recommendations to RME for changes necessary to keep regulations up-to-date.

Works on budget yearly, for Coordinator's Office and/or Riot Arrest Teams.

Performs other miscellaneous projects as needed.

INSTITUTIONAL SERVICES DIVISION
FUNCTIONAL SYNOPSIS

Institutional Services Division is one of seven divisions under Associate Commissioner of Administration Paul Herring.

The Director is responsible for Food Services, Food, Meat, and Milk production and processing operations, Laundry Technical Services, and warehousing of food, clothing, consists of ten sections with those supervisors reporting to the Director.

The Food Service Administrator works for the Director and is responsible for menu planning, master menu preparation, technical assistance, and training of Food Service personnel. He is responsible for all designs and equipment requirements for new and renovated facilities.

Also, schedules and makes regular visits to all institutions on a quarterly basis to review sanitation procedures, food preparation, and special diets.

Food Processing produces approximately four million pounds of food items yearly. These consist of 36 items, such as vegetables, both frozen and canned; wet batching items consist of syrups, jellies, sauces, etc.; dry batching items consist of drink mix, gelatins, corn bread mix, pancake mix, etc. Food produced is 30 to 60 per cent less than wholesale prices.

All production activities utilize computerized production reports that were designed by the Director to account for raw materials in inventory and produce a finished product count with cost of each finished product.

Meat Processing produces over two million pounds of meat products consisting of 16 different portion-controlled, preseasoned products. The cost of finished products are 51% less than wholesale prices.

Milk Processing began operation on August 17, 1989, after a two year study determining the feasibility of this type of operation. Milk is prepared from a powdered formula developed by the division. Milk is produced at a cost of seven cents per one half pint carton. Wholesale price is thirteen cents, as of 1989.

Laundry Technical Services provides all technical assistance and training for all laundry personnel. The Laundry Services Coordinator makes regular visits to all major institutions to coordinate all matters involved in laundry operations.

Warehouse Operations stores all food, meat, and milk products produced by the division, in addition to outside purchases and USDA commodities. The division has nine food and commodity warehouses and two engineering supply warehouses.

One food warehouse is located at Limestone and one engineering supply warehouse is located in the Elmore area complex.

Our total inventory is computerized, permitting total control of all assets.

Accounting Section is responsible for correct processing of all invoices of purchases made by the division. Record keeping of all personnel records, payroll data, production reports, and building and vehicle insurance is the responsibility of this section.

Fleet Dispatch is responsible for the development of delivery schedules weekly for the delivery of all items shipped from our warehouse to each institution.

Requisition/Requirements Section is responsible for the computation and preparation of all requisitions for this division, including production requirements to our processing facilities. This section is responsible for ordering approximately seven million dollars of food and other supplies yearly.

Maintenance Section is responsible for repairs and maintenance of the total division. Preventative maintenance schedules are prepared and utilized to insure all equipment is properly maintained. This division has more refrigeration equipment than the total Department of Corrections, in addition to boilers, processing equipment, and material handling equipment.

LEGAL DIVISION
FUNCTIONAL SYNOPSIS

The Department of Correction's Legal Division provides representation and legal counsel to the Department of Corrections.

This division represents the Department in litigation in which the Department and/or its employees are parties. Examples of such litigation are: prisoner civil rights cases, inmates habeas actions, Board of Adjustment claims, cases before the State Personnel Board, employee lawsuits (filed primarily under Title VII), and the occasional wrongful death, tort, or contract action.

The Legal Division also drafts contracts, leases, and agreements to which the Department is a party.

Additionally, the Department gives legal opinions in response to oral and written requests and draft requests for Attorney General's opinions when necessary.

ACCESS-TO-COURTS: The Access-To-Courts/Library Services Unit has many functions in rendering services throughout the Alabama Prison System. The unit provides information and technical services to the Department's general counsel and staff attorneys, by managing its law library and keeping the attorneys abreast of relevant, current developments in the law; by insuring that the division heads' Code of Alabama, 1975, as amended, it supplemented and kept current; and providing photostatic copies of cases and relevant legal articles/information to the Advanced Training Unit/Academy and other divisions, upon request.

The Access-To-Courts/Library Services Administrator directly supervises three (3) programs, namely: (1) The Four-Level, Inmate Law Clerk and Law Library Supervisor's Training Course; (2) The Julia Tutwiler Legal Aide's Training Course; and (3) The Access-To-Court Correspondence Course.

The Department of Corrections meets its legal access obligation to prisoners by establishing law libraries throughout the prison system and implementing three specialized training programs.

PERSONNEL DIVISION
FUNCTIONAL SYNOPSIS

The Personnel Division is responsible for human resources management in the Department of Corrections. Functions performed by this division include recruitment and selection of new employees, position classification, employee orientation, performance appraisal and merit ratings, employee counseling, retirement planning, personnel budget preparation, employe recognition program, employee grievance procedures, Equal Employment Opportunity Programs, employee suggestion awards programs, employee assistance programs, pay and maintenance of personnel records. This division also functions as liaison with the State Personnel Department and advises the Commissioner, Deputy and Associate Commissioners, institutional and department staff heads and their assistants, other employees, and applicants regarding personnel rules and regulations as they affect the department and employees.

The total employment complement is 3,006. Of these 2,984, or 99.2% are merit system employees. Approximately 2,151 are in the correctional officer classifications. There are approximately 176 classifications in the Department of Corrections. At present, approximately 44% of the total work force is black.

PROCUREMENT DIVISION
FUNCTIONAL SYNOPSIS

The Procurement Division consolidates several General Office purchasing-related activities, refines and standardizes requisition procedures throughout the Corrections system, provides staff assistance to field units, and coordinates those activities and procedures with the State Purchasing Department.

PUBLIC INFORMATION DIVISION
FUNCTIONAL SYNOPSIS

The Public Information Division is responsible for initiating and responding to the news media and general public about issues or events concerning the Department of Corrections. This division also supervises the operations of the Free By Choice drug prevention program. Other duties include producing internal videos and informational videos to the general public; scheduling speaking engagements and tours; writing various printed publications as well as the monthly employee newsletter; teaching public relations at the Corrections Academy; and assisting in other public relations functions.

RESEARCH, MONITORING AND EVALUATION (RME) DIVISION
AND
LEGISLATIVE LIAISON
FUNCTIONAL SYNOPSIS

The Research, Monitoring and Evaluation (RME) and the Legislative Liaison Division is responsible for accomplishing:

1. Research - Conducts thorough feasibility studies, studies of existing programs and research which become the basis for senior management decisions and in developing long-range plans.

2. Monitors - The unit monitors departmental progress in numerous areas including population growth, program effectiveness, and data analysis. Monitors all departmental grants to assure compliance with grant requirements and monitors all studies and research projects conducted by outside agencies. Develop and produce monthly and annual reports which monitor departments activities.

3. Evaluation - Conducts evaluations in numerous areas including management, process and procedural in order to determine the assurance that the department is getting the maximum value for each dollar expended.

4. Legislative Liaison - Develops and records all legislation to be introduced during legislative sessions for the department. Monitors all legislation and insures those bills which could have an adverse impact on the department are reviewed and action taken to meditate the effect.

TRAINING DIVISION
FUNCTIONAL SYNOPSIS

The Training Division includes a Basic Academy and eight Advanced Training Centers.

The Basic Academy is located in Selma, Alabama and provides 280 hours of training for all new correctional officer trainees. Employees must graduate from the Basic Academy for continued employment and to gain law enforcement status certification. The Basic Academy has eight staff members and trains approximately 450 employees each year.

The Advanced Training Centers provide a 24 hour per year continuing education program for each law enforcement status employee assigned to an institution, 32 hours per year for law enforcement status employee's assigned to a Work Release Center or the Farquhar State Cattle Ranch. A one time only 40 hour Orientation Course is conducted for all new non-law enforcement status employees.

At total of 14 staff members are assigned to Advanced Training. The eight training centers train approximately 2,500 law enforcement status employees and approximately 150 non-law enforcement status employes annually.

TREATMENT DIVISION
FUNCTIONAL SYNOPSIS

The Treatment Division develops, administers, and evaluates mental health programs, including substance abuse treatments, and programs for treatment of sexual deviancy. Functions supervised include psychological evaluation at intake, periodic psychological updates, treatment planning, primary and preventive mental health services to inmates, psychological referrals, pre-release programming, inmate drug testing, and staff recruitment and development.

ALABAMA
DEPARTMENT
OF
CORRECTIONS

DEFINITIONS

ALABAMA DEPARTMENT OF CORRECTIONS

DEFINITIONS

1. Maximum Security is the highest custody grade to which an inmate can be assigned. (Supervision: A maximum security inmate must be housed in a single occupancy unit in the institution. When not in the living area, the inmate must be escorted by two correctional counselors. Additionally, movement within the institution is restricted to designated areas, and for movement outside of the institution and two counselors must be properly armed and restraining devices must be used.) Criteria for placement in Maximum Security is as follows: (a) Institutional demonstration of violent behavior (assault with a deadly weapon) within the last 12 months. (b) Repeated and/or frequent (three or more) disciplinaries for assault with a weapon on other inmates or officials within two years. (c) Assaultive behavior resulting in death (at least until trial). (d) Escape with hostages or personal injury within the last 24 months. (e) Inmates being held for trial on a detainer warrant for a capital offense will be held in maximum custody until tried and either sentenced or acquitted.* (f) Inmates in maximum custody whose security requirements, as determined by the DSRB, remain unchanged since placement in that custody such as riot participants, perpetrators of violent acts within the institution or severe escape risks.

   *Does not apply to inmates serving LWOP sentence which has been reversed and remanded for retrial or out of state cases where there is verification death penalty is not being sought and there is no equivalent to Alabama's life without parole sentence.

2. Close Custody is the second highest custody grade to which an inmate can be assigned. (Supervision: A close security inmate must be housed in a single occupancy unit. Movement in the institution is restricted to that which can be observed by a correctional counselor. Movement outside the institution must be accompanied by a correctional counselor properly armed. Restraining devices must be used.) Criteria for placement in close security is as follows: (a) Inmate sentenced to life without parole (Life Without Parole Inmates (LWO)) - LWO inmates area not subject to parole. It includes those inmates who have been sentenced to life without parole and those inmates serving life sentences who have been determined by the Board of Pardons and Paroles to be ineligible for parole consideration.) (b) Three disciplinaries for fighting within the last year may be reason for placement in close security. (c) More than

one escape from maximum security institution within the last three years. (d) Maximum security inmate with no disciplinary reports in the last six months and no escape with hostages or personal injury within last 24 months. (e) Continued demonstration of inability to live within the regulations of the institution and requirements for group living as indicated by more than three major disciplinaries with a six month period may subject an offender to placement in close custody. (f) Institutional demonstration of violent behavior -assault in the last 12 months may be reason for placement in close custody. (g) Inmates in close custody whose security requirements, as determined by the DSRB, have remained unchanged since placement in that custody such as riot participants, perpetrators or violent acts within the institution, or severe escape risks.

3. Medium Custody is less secure than close and is for those inmates who have demonstrated less severe behavioral problems. Inmates in this category are considered to be capable of participating in formalized institutional treatment programs without violent behavior. Inmates should be able to adapt to dormitory life. (Supervision: The inmate must be assigned to a major institution, although group living is permitted. Movement within the institution must be observed by correctional staff. When outside the institution, this level of custody inmate must be accompanied by an armed correctional counselor. Criteria for placement in medium custody is as follows: (a) Escape within the last one year (three years if force is used) or two escapes within five years. (b) Felony detainer. (c) Escape behaviors (jumping bond, AWOL, parole and probation violations for absconding or failure to report) within the last three months. NOTE: On an individual basis, you can consider deleting failure to report as escape behavior. (d) Psychological prediction of emotional instability which is concurred in by psychologist which is within last six months. (e) Life without parole (as described above). (f) Short time release date of more than seven years. (g) Close security inmate with no disciplinary reports in the last two months and no escape from maximum security institution within the last three years.

4. Minimum Custody is the level of placement which is appropriate for inmates who do not pose a risk to self

and others. Evidence must indicate an ability to adjust to an institutional environment prior to this level of custody being assigned. Inmates in minimum custody who are to be used by engineers, industries, maintenance outside the perimeter security of the housing institution or for jail renovation must be approved by the CRB even where there is unanimous agreement at the institutional level. (Supervision: Minimum custody inmates may be housed in any facility operated by the DOC provided they meet security level requirements for that facility. Exception: Inmates serving more than one consecutive life sentence who achieve minimum may be housed only in a major facility and may not be permitted outside the facility without direct supervision of custodial staff.) Criteria for placement in minimum-in custody is as follows: (a) Level I* - short time release date of less than seven years (may include parole review date). *Time table for Level I - five years to minimum release date or parole consideration. Inmate(s) convicted only of property crimes. No prior convictions for violent crimes that would prohibit SIR placement. Can meet SIR criteria except for time criterion. Level II - short time release date of less than five years (may include parole review date). Level III - short time release date of less than four years (may include parole review date). Level IV - short time release date less than three years. Level IVB** -No more than 24 months to minimum release date or 18 months to parole consideration date. **This criterion does not indicate automatic approval in all cases of heinous crimes. Each application will be considered on a case by case basis. (b) No sex offense*** ***This is not limited to present or past convictions for a sex offense. It may also apply where the details furnished to the DOC by the courts, by PSI, by the District Attorney, or other official source shows that a sex offense was involved in the commission of the crime for which the inmate was convicted. (c) No felony detainers. (d) Not an escape risk (refer to criteria for medium custody). (e) Has not been sentenced to two or more consecutive life sentences. Those in minimum custody as of 9-24-85 may remain; however, if removed from that custody for any reason will not be eligible for return to minimum custody. (f) Evidence of ability to adjust to institutional environment. (g) Medium security inmate with no disciplinary reports in the last 90 days (180 days if serious) and no life without parole.

5. Trusty II is the custody level required for placement at the Farquhar State Cattle Ranch. Inmates for this custody and placement must be approved by the CRB. Advancement to full Trusty custody will require CRB approval.

6. Trusty is the custody level awarded to those inmates who have demonstrated exceptional trustworthiness and an ability to function well with minimal supervision. (Supervision: Inmate may be housed in any facility operated by the DOC. Direct custodial supervision is not required; however, inmates will be supervised and accounted for during their time spent at the facility and while participating in facility activities. Inmates eligible for this custody. This custody is limited to those inmates with skills needed by the DOC engineers, industries, community projects, and/or special projects as designated by the Commissioner.) Criteria for this custody (a) Must be within five years of minimum release date/parole consideration. (b) All inmates selected for trusty custody must be approved through regular progress review by the CRB. Recommendation must state the division or facility to which inmate assignment is requested and the specific skill or departmental function the inmate will provide. (c) Recommendation by the Warden, Director, or with agreement by the CRB, and the Director of Classification. (d) Must not have been convicted of crimes with potential for negative community reaction. Property offenders will have priority. (e) No escapes within the last 18 months.

7. Community custody is appropriate for those inmates who have shown an ability to adjust to a semi-instructed environment and is in the state of his incarceration where an intensive reintegration effort is warranted. (Supervision: Inmates in this category who are assigned to community facilities will be supervised and accounted for during their time spent at the center and while participating in facility activities. On other occasions, direct supervision or hourly checks are not provided.) Criteria for this type of custody is as follows: (a) No major disciplinaries within the last three months. (b) No escape within the last 24 months. Any escape will render that inmate ineligible for community custody consideration for a minimum of two years. (c) Not dependent on drugs or alcohol or with

serious long term use pattern. If prior dependency or serious long term use pattern is evident, has completed substance abuse treatment since incarceration. If inmate has been removed from community custody placement due to positive test for cocaine or other hard drugs, the reclassification committee, after careful consideration of the drug/alcohol abuse history, including whether or not the inmate has been addicted to the abused substance, will specify the level and duration of treatment necessary prior to consideration for return to community placement. This should include a minimum of: six months of successive clear urine screens, completion of six months active regular participation in a drug/alcohol self-help group, satisfactory completion of the drug/alcohol treatment notebook, extended/additional requirements should be prescribed as indicated by the seriousness of the level and duration of the substance abuse. (d) Good physical condition. Class I only. (e) Offender and crime not such as likely to provoke negative community reaction. Protest by the District Attorney in county of conviction will require waiver by the Director of Classification. (f) Inmate has not committed a felony while on work release, SIR or PDL within the last four years. Any prior felony involving violence while in community custody will render that inmate ineligible for community custody consideration during present incarceration. Inmates convicted of felony property offenses cannot be considered for community custody until four years from the date of the infraction. (g) If prior community placement, second placement must be at least three months after first failure. Two prior failures in community custody will render that inmate ineligible for community custody placement during present incarceration. Failure of an inmate who is on a prescribed dietary and/or medication regimen to responsibility adhere to that regimen to the point that there is a recurrence of debilitating illness, will be considered sufficient grounds for removal from the program and will be counted as a failure on work release. Because a single failure for this reason may constitute a health hazard to the inmate, he/she will not be returned to that program. (h) Inmate has not been convicted of felony assault on a police officer or correctional employee. (i) No detainers.

8. Level III - three years to minimum release date or

parole consideration. Inmate convicted of Class A crimes with no serious* injury to victim(s). *Serious injury is defined in Alabama Criminal Code 13A-1-2-(9) (1975) as physical injury which creates a substantial risk of death, or which causes serious and protracted disfigurement, protracted impairment of health or protracted loss or impairment of the function of any bodily organ. Inmate will probably never be SIR eligible. Inmate may have been convicted of domestic murder/crime of passion.** Inmate may have been convicted of manslaughter or vehicular homicide.** **These cases will be individually considered on a case by case basis.

9. Level IV (A) - Thirty months to minimum release date or parole consideration. Inmate has been convicted of murder or manslaughter. Inmate has been convicted of armed robbery with serious* (see explanation above) victim injury. Inmate convicted of Class A crimes has a history of escapes (two or more). Any of the above require excellent sustained institutional records (six months or more disciplinary free) and will be considered individually on a case by case basis.

10. Level IV (B) - ** No more than 18 months to minimum release date or 12 months to parole consideration date. **This criterion does not indicate automatic approval in all cases of heinous crimes. Each application will be considered on a case by case basis. HEINOUS CRIMES SUCH AS: (a) Multiple murders. (B) Murder with torture. (c) Terrorist murder. (d) Murder with mutilation. (e) Robbery murder. (f) Contract murder. (g) Murder with kidnapping. (h) Murder in child abuse. (i) Other highly publicized heinous crimes likely to provoke negative community reaction.

11. Level V - Never eligible for program. Sex offenses.*/** Drug trafficking. Assault on police officer, corrections official or corrections employee (felony conviction). Committed violent crime on escape, on SIR, PDL, or on work release. Two prior failures on community custody present incarceration.

*This is not limited to present or past convictions for a sex offense. It may also apply where the details furnished to the DOC by the courts, by PSI, by the District Attorney was involved in the commission of the crime for which the inmate was convicted.

**Where sex offense(s) are clearly non-violent, i.e., (a) peeping tom; (b) indecent exposure; (c) producing pornography which does not involve minors, etc. may be considered on a case by case basis.

12. LIFE WITHOUT PAROLE INMATES (LWOP) are those inmates defined as serving a life sentence who are not subject to parole. It includes those inmates who have been sentenced to life without parole and those inmates serving life sentences who have been determined by the Board of Pardons and Paroles, to be ineligible for parole consideration.

COMMISSIONER'S MESSAGE

It is with pleasure that I present to you this Annual Report on Correctional Industries for fiscal year 1990.

Again, the Report is a very positive one and I am proud to show continual growth in this aspect of the Department of Corrections. I continue to enjoy the prospect of a program which is totally self sufficient and poses no burden on the taxpayers of Alabama.

This Report indicates the continual progress and growth of a sound correctional program, one that is respected throughout the State of Alabama and recognized as a leader in the United States.

This, of course, is not possible without dedicated, hard working, staff and management personnel, line supervisors, and the inmates working in the program.

Morris Thigpen
Commissioner

ASSOCIATE COMMISSIONER'S MESSAGE

It is with pleasure that I submit this Alabama Correctional Industries Annual Report. A Report which shows the continual growth of the program.

As I have said before, the success of Alabama Correctional Industries can only be attributed to the dedicated supervisory staff, the inmate workers who provide the goods and services, and the continued support of the Governor, his cabinet, our Commissioner, the Legislature, state, county, and city agencies and the people of Alabama.

Our promise to the Alabama taxpayer is to strive for continual growth, remain self sufficient, provide meaningful work for the inmates, and reduce the cost of incarceration.

Tommy Herring
Associate Commissioner

EXECUTIVE STAFF

Left to Right—Ernest Pattillo, Gene Giles, Bob Bright, Curtis Hayes, Harrell Huff, and Andy Farquhar.

ERNEST PATTILLO
Production Manager
Pattillo joins ACI after seventeen years as President and General Manager of Pattillo Milling Company and ten years on the Board of Directors of the Peoples Bank, Tallassee, Alabama.

GENE GILES
Industries Coordinator
Giles has been with ACI for eleven years serving as Marketing Representative, Production Manager and his present position. Previously, he was Production Control Manager for a large printing plant.

BOB BRIGHT
Director of Agriculture, Forestry and Land Management
Bright has spent his entire career in the field of agriculture and agribusiness, serving the last twenty years in the present position. Previously he was a Vocational Agriculture teacher, an Extension Service County Agent and a Farm Engineer for Portland Cement Association.

CURTIS HAYS
Industries Coordinator
Hays came to corrections in 1978, bringing with him more than thirty years experience in fleet expertise. His history includes assignments such as general office manager, Manager of Safety Operations and a degree in Personnel Management.

HARRELL HUFF, CIA
Director of Fiscal Operations
Huff came to ACI from Blount Inc., in 1987 after serving as plant controller. Previously, he had more than twenty years experience in financial management with several companies, holding positions as Controller, Assistant Controller, and Audit Supervisor.

ANDREW FARQUHAR
Information Systems Manager and Assistant Director of Agriculture, Forestry and Land Management
Farquhar joined ACI in 1985 as Assistant Agriculture Director. In 1989 he accepted the additional responsibilities of Systems Manager. His background includes nine years experience in consulting, operations management, and data collection and analysis.

ACI MISSION

The mission of Alabama Correctional Industries is threefold:

1. To provide a work program for inmates in the Alabama Correctional System;
2. To provide goods and services to state agencies and political subdivisions of the state (counties, cities, etc.) and;
3. To remain self supporting and therefore save the tax dollars of the state.

MANUFACTURING OPERATIONS

Manufacturing Operations continued to improve and increase production in all existing industries through growth in sales and additional product lines within existing industries. A summary by region follows:

A. NORTHERN REGION

This region has industries located in the West Jefferson and the St. Clair institutions. The Furniture Assembly Plant, which manufactures the office modular systems and employs 36 inmates, is located at West Jefferson.

The St. Clair facility provides the labor for the Janitorial Products Plant, Mattress Manufacturing, Furniture Restoration, Powder Paint System and Chair Manufacturing. This plant employs 81 inmates.

B. CENTRAL REGION

This region houses the bulk of the industries operations. The Draper facility is home to the Furniture Manufacturing Plant which currently operates two shifts. This plant also furnishes custom items, mill work and tops and flipper doors for the office modular systems. One hundred and three inmates are employed here.

Tutwiler (the women's facility) provides the labor for the Data Entry Operation and the Clothing Plant, which manufactures all clothes for the Department of Corrections. Both of these plants operate two shifts and employ 138 inmates.

The Remodeling and Construction Division at Red Eagle saw the largest expansion with an additional remodeling crew (now 12) and an additional institutional construction unit, with additional crews to meet the needs generated by contracts to renovate state offices vacated when the Gordon Persons Building was finished. The Institutional Construction Unit completed a 205 bed minimum custody institution at Childersburg at a cost of about $5300 per bed. These operations employ 87 inmates.

The Printing Plant located at Kilby operates two shifts, and employs 107 inmates.

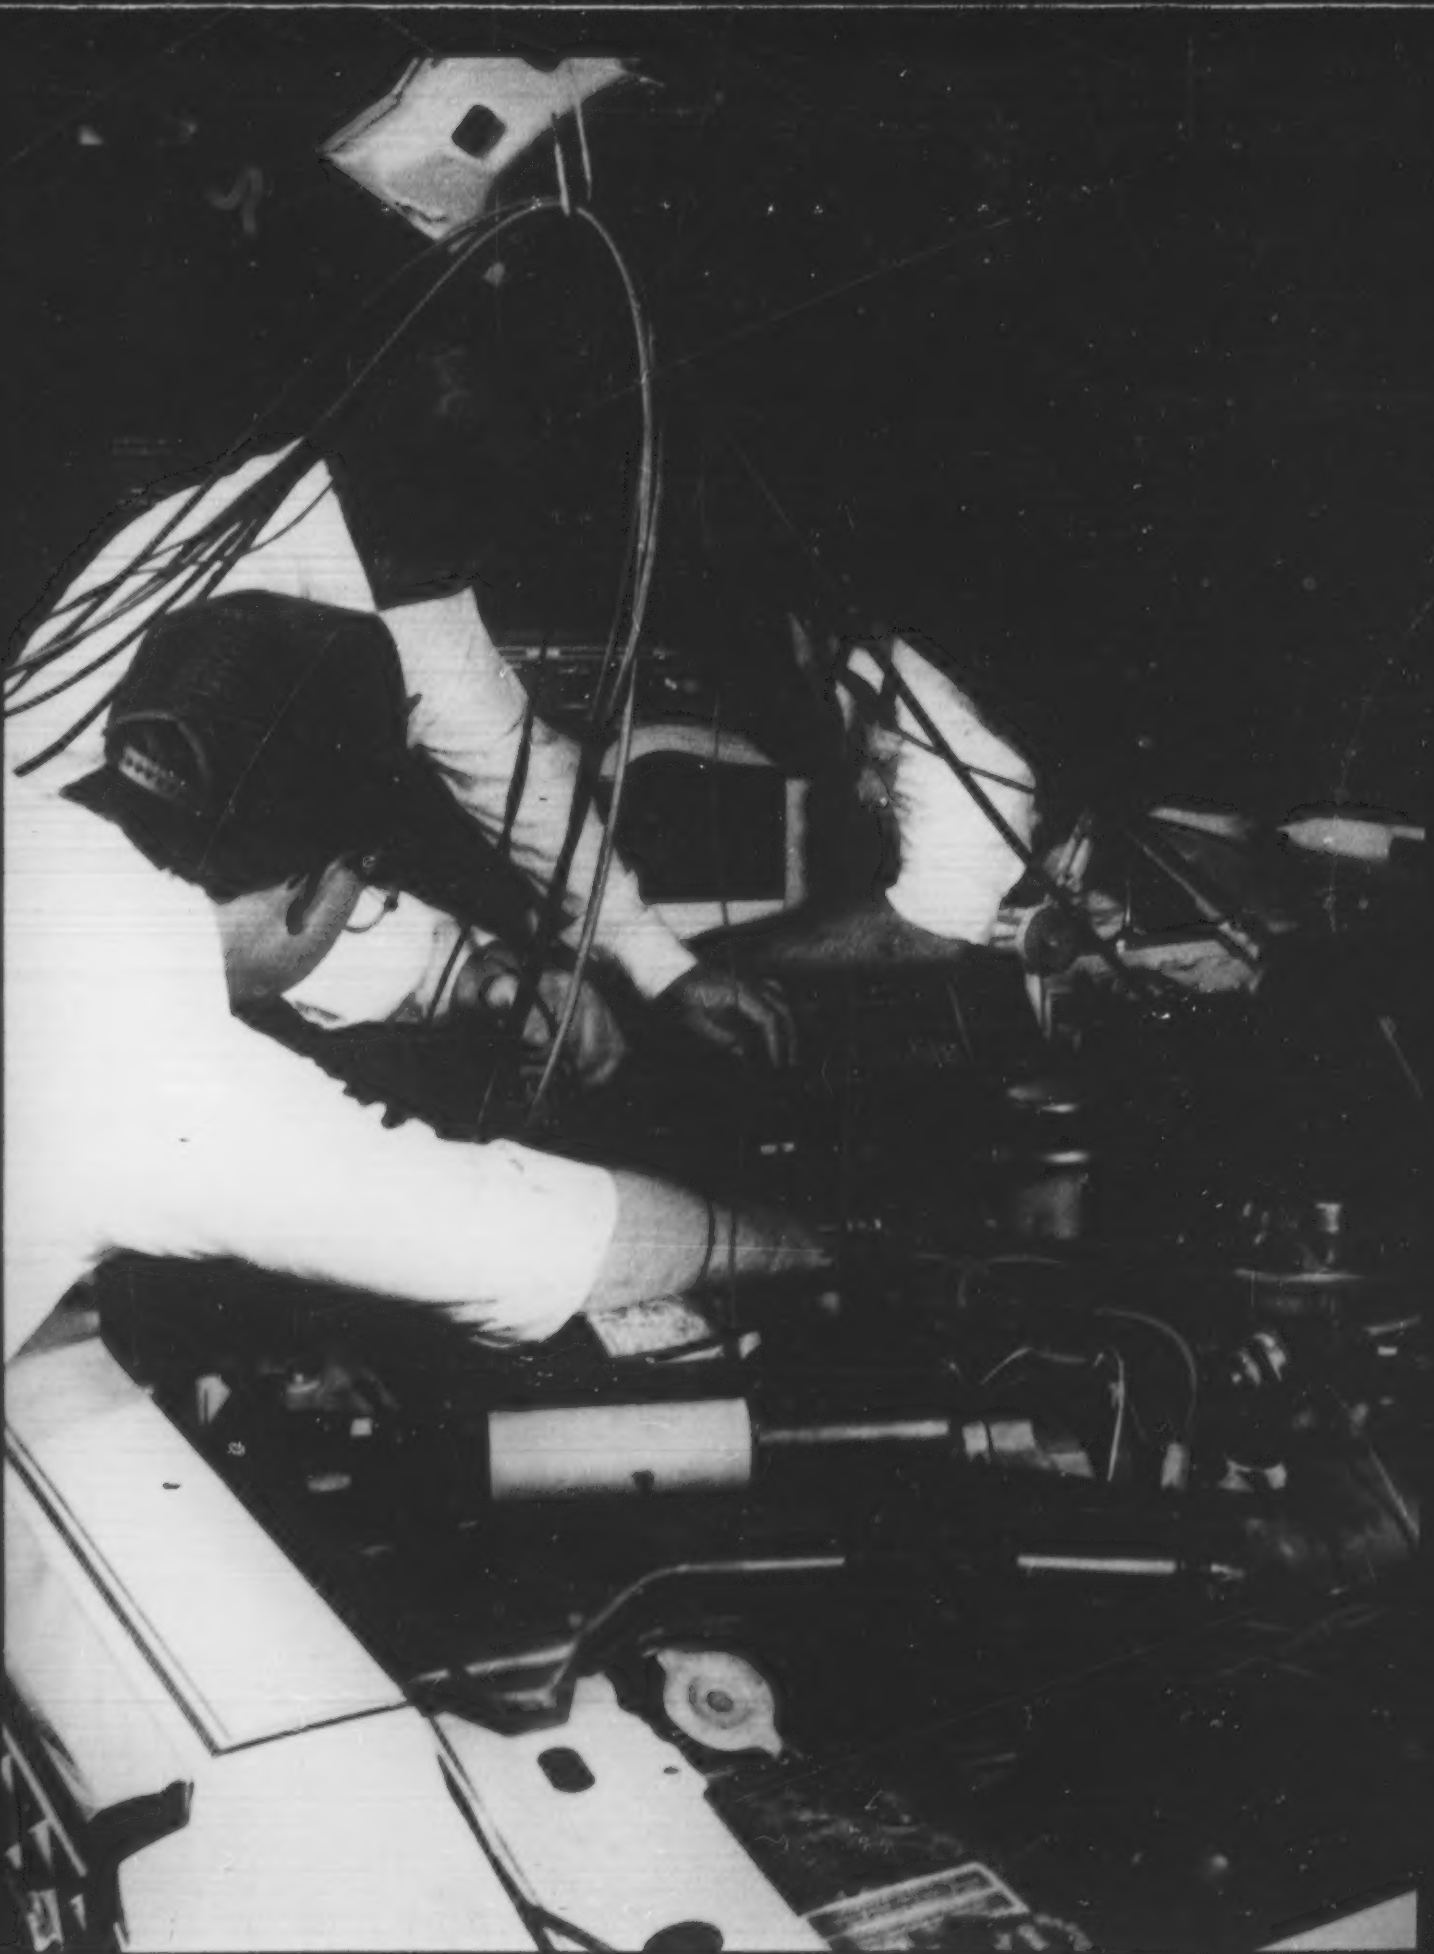
The Industries Warehouse, occupying 135,000 square feet, is centrally located in Montgomery and provides transportation and storage for all industries products. Twenty-eight inmates are employed by this complex.

C. SOUTHERN REGION

There are two industries located within the Holman Unit. The Tag Plant is responsible for all license plates produced for the state. Added interest in this area has been due to increased use of vanity tags and the new university tags. The Metal Fabricating Plant enjoyed expanded growth due to additional product lines used to support other industries. For example, this plant produces all acoustical panel frames for the office modular systems produced at the Furniture Assembly Plant at West Jefferson. Institutional furniture is manufactured by the new correctional complex at Clayton and Clio. There are 108 inmates employed here.

Two industries, box and carton manufacturing and chairs (which will move from St. Clair) will be located at Ventress Correctional Facility in Clayton and will provide work for the After Care Inmates involved in the Drug Treatment Center. 100 inmates are employed here.

Easterling Correctional Facility in Clio, Alabama, houses the Chemical Specialty Plant (Latex Plant) and employs 50 inmates



FLEET SERVICES

Alabama Correctional Industries (ACI) Fleet Services Division is comprised of three (3) vehicle repair and maintenance facilities and one (1) vehicle restoration plant. These facilities are conveniently located throughout the state and are easily accessible to all agencies.

The Fleet Services Division provides a reliable and economical means of vehicle maintenance, repair or restoration for the entire Department of Corrections fleet and other vehicles which are supported by tax dollars.

Equipment Plant Supervisors, Benny Agerton, Rick Tyler, Billy Winston and Jerry Harrelson, supervise the operations of a staff of approximate 25 freeworld employees consisting of lead mechanics, mechanical stock clerks, heavy equipment mechanics, plant maintenance supervisors, and 100 skilled and non-skilled inmate workers.

With General Motors, Ford Motor Company and Chrysler Motor Company training available locally our staff is involved in a continual effort to upgrade their skills and training. This training, combined with the latest technological equipment, allows our staff to perform repairs and restoration work the most efficient way. They pass this training on to our inmate workers which results in quality work for our customers while providing the inmate workers with valuable training and experience. This method saves tax dollars by keeping vehicle repair and restoration costs to a minimum, yet provides the inmates with marketable skills to benefit both themselves and society upon their release.

Our facilities are equipped with modern diagnostic equipment such as the SUN engine analyzer and the latest technical services material from the automotive industry. Our administrative needs are handled by the latest computer systems to maintain parts inventories, vehicle maintenance records, fiscal operations and general office administration.

With our extensive training program, modern facilities and equipment we provide major and minor repairs on almost any kind of vehicle or equipment such as engine or transmission overhaul and repair, complete vehicle restoration for fire trucks, buses, cars and trucks, auto body damage repair and painting, upholstery repair and preventive maintenance.

During fiscal year 1989-90, ACI repair and maintenance facilities completed 5,694 operations with our vehicle restoration facility completing 27 renovations. Based upon work orders to date, the repair and maintenance restoration facilities will exceed last year s totals with the vehicle restoration facility showing a 100% increase in orders during the 1990-91 fiscal year. All of this work is performed by inmate workers supervised by our well trained staff.

ACI Fleet Services Division takes pride in our excellent record of performing quality work while keeping costs to a minimum. Hopefully our success provides an incentive for all tax supported agencies to utilize our facilities. The results are inmates learning a productive skill, your vehicles are well maintained, and tax dollars are conserved because of lower expenditures for vehicle repair and maintenance.

FISCAL OPERATIONS

At the end of Fiscal Year 1990 Alabama Correctional Industries Fiscal Operations consisted of 29 accountants and account clerks handling accounting functions at the central office and at plants, farms, and garages located across Alabama.

The Central Office Accounting staff consists of the Fiscal Director, an Accountant III, three Accountant II's, six Account Clerk II's, a Property Officer and a secretary.

The Southern Area Consolidated Accounting Office consists of an Accountant II Supervisor and two Account Clerk II's. This office covers Fountain Fleet Service, Fountain Farm, Tag Manufacturing, and the Metal Fabrication Plant.

The Central Area Consolidated Accounting Office consists of an Accountant II Supervisor and five Account Clerk II's. This office covers Draper Fleet Service, Draper Farm, Red Eagle Farm, Institutional Construction, Remodeling, and the Furniture Plant.

There are eight other Account Clerk II's covering accounting operations at Limestone Fleet Service, Limestone Farm, St. Clair Fleet Service, Furniture Restoration, Chair Assembly, Furniture Assembly, Cattle Ranch Farm, Data Entry, and production plants for Janitorial Products, Printing, Vinyl Binding, and Clothing.

The Local Government Financial System (LGFS) computer operations are fully functional with reports and procedures being refined to produce a detailed cost accounting system.

INFORMATION SYSTEMS

The Information Systems (IS) division completed its first full year operation in 1990 making tremendous strides toward the ultimate goal of fully automating ACI's operational and management systems. Its principle focus continued to be the implementation of a fully-integrated accounting and financial package that incorporates modules for monitoring inventories, manufacturing costs, fleet management, fixed assets, sales orders and production control. The project is part of a state-wide effort to markedly improve the state's management capabilities of Alabama's financial and human resources of which ACI was a pilot member.

Utilization of the integrated accounting package by ACI began in earnest in 1989 with installation of the base accounting system. Inventory management and work order modules were also introduced at a limited number of sites. Installation in all 24 of ACI's current operations was completed in early 1990. Since their implementation, material and labor costs have been recorded and analyzed on over 13,000 ACI work orders. The work order module, in particular, has also greatly enhanced the efficiency with which inmate payroll information is collected and processed.

Other notable accomplishments within ACI's IS division during 1990 was the installation of two other subsystem packages, namely the fleet management and fixed assets modules. The fleet management module is heavily utilized by ACI's four vehicle service operations, providing both performance and repair information on approximately 600 ACI and client vehicles. Assisted by the state's Financial Resource Management Systems technical staff, all of ACI's 4000+ equipment items were processed and loaded into the fixed assets subsystem in slightly under three months.

Work also got underway in 1990 on two custom modules which will streamline the processing of ACI customer sales orders and the management of plant production. The sales order system will feature point-of-sale data entry by sales representatives and is projected to cut delivery schedules by 7-10 days.

Part of Alabama's state-level financial restructuring has been the implementation of a new, automated purchasing system that enables on-line entry of purchase requisitions at the operational level. The IS division, in conjunction with ACI's procurement staff, has provided technical assistance and over 200 hours of training and support to ACI field personnel in implementing this new system.

Commiserate with the implementation of additional systems and applications, ACI's data and telecommunications network also continued to expand in 1990 with the acquisition of over $60,000 in terminals, printers, and communication equipment. Capabilities have also been acquired to compose and generate in-house financial reports lessening ACI's dependence on outside custom programming services.

ACI is extremely proud of the progress made during 1990 in the development of its financial management and information systems. The enhancements planned and being implemented in 1991 will further its stature as a model for other prison industry programs to follow.

AGRICULTURE

The Agriculture Division of Alabama Correctional Industries is composed of five (5) farm operations located throughout the state from the Tennessee border to the Florida state line. All farms are diversified in that they produce a variety of crops and/or livestock. The largest farm, Fountain Farm, consists of 8,500 acres and is located in Escambia County near the Florida line. The smallest farm, Limestone Farm, consists of 1,200 acres and is located at the opposite end of the state in Limestone County. Draper Farm, 3,301 acres and Red Eagle Farm, 2,300 acres, are located in the central part of the state near Montgomery. The Charles A. Farquhar State Cattle Ranch, encompassing 4,410 acres is located in West Central Alabama near Greensboro, Alabama. The Agriculture Division is also responsible for Forestry and Land Management on all Department of Corrections properties. In addition to the aforementioned five (5) farms, there is extensive woodland acreage at West Jefferson Correctional Facility, St. Clair Correctional Facility, Clayton and Clio. The major enterprises of the Agriculture Division are field crops, garden crops, livestock and forestry.

Field crops, grown at all locations consists of corn, soybeans, grain sorghum silage sorghum, wheat and oats. Fountain, Draper and Red Eagle planted 2,375 acres of corn. Most of the corn is used by the Agriculture Division for livestock feed with the surplus going on the open market for cash income.

The main row crop grown for cash income is soybeans. All farms except the Cattle Ranch produced soybeans in 1990 to the extent of 3,067 acres. All of the production was sold on open market. Contract crops such as Pimento peppers at Limestone and cucumbers at Fountain generated cash income of $80,000. Draper planted 240 acres of cotton in 1990 and produced more than 1¼ bales per acre; the first cotton produced by the prison system in 15 years.

Crops grown to support the livestock program include part of the corn, 190 acres of grain sorghum at Draper which was fed at the Draper Swine Unit, 200 acres of silage sorghum at the Cattle Ranch which was fed in the form of silage to the cattle at the Ranch. Wheat and oats, 1,090 acres and 202 acres respectively are grown partly for winter cover, grazing and for grain.

Garden crops are grown at Draper Farm under irrigation. Among the vegetables produced in 1990 were sweet corn, cabbage, okra, egg plant, bell pepper, radishes and tomatoes. Practically all of the vegetables go to the processing plant and are either canned or frozen for shipment to all prison facilities. Eight-nine acres of vegetables were harvested under the irrigation system which produced 711,200 pounds of produce.

Livestock enterprises engaged in by the Agriculture Division are beef cattle, swine, catfish and horses. All livestock are produced for the purpose of generating cash income with the exception of horses which are produced to provide the needs of security. Beef cattle are produced at Fountain, Red Eagle, the Cattle Ranch, and a heard started in 1990 at Limestone Farm. These farms had 1,004 brood cows in 1990 and produced $417,584 gross income.

The Swine Unit is located at Draper Farm. It is a modern farrow-to-finish operation consisting of 416 sows and produced $518,374 gross income in 1990.

The catfish enterprise is at the State Cattle Ranch only. In 1990, there was approximately 400 acres of water in production. Catfish has been the most profitable of all the farm enterprises in recent years. The catfish enterprise is a birth-to-market operation. The hatchery and fingerling ponds produce enough fingerling to stock 400 acres of production ponds. The surplus fingerlings are sold to local fish farmers. Gross income from the catfish in 1990 was $355,289.

Horses are maintained for security officers on farm operations. A horse breeding program is conducted in order to produce replacements to maintain the number of work horses needed. Surplus horses are sold on open markets.

Forestry management programs are planned to give ACI an annual income from forest products and promote regeneration and continuous growth. Management practices also include the enhancement of food and cover for wildlife. The Alabama Forestry Commission is under contract as advisor to Corrections on good management practices. AFC also advises Corrections when timber is ready to sell.

NOTES TO FINANCIAL STATEMENTS

1990, 1989, 1988

Note (1) Summary of Significant Accounting Policies

(a) Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis. All inter-divisional balances and transactions have been eliminated in combination. Contributions of certain livestock have been recorded at estimated fair market value at date of contribution.

(b) Cash

Cash consists of the cash balance controlled by the Finance Department for the Correctional Industries account.

(c) Inventories

Inventories are stated at cost using the average cost method.

(d) Livestock

Livestock which consists of cattle, swine, and horses is stated at cost except for contributions noted in 1(a).

(e) Land, Property and Equipment

Land is stated at cost. Property and equipment are stated at cost and are depreciated over their estimated useful lives on a straight line basis.

Note (2) Land, Property and Equipment consists of the following:

	1990	1989	1988
Land & Buildings	2,435,912	969,448	965,610
